Re: United States Department of Transportation, Better Utilizing Investment to Leverage Development (BUILD) Grant 2019: Riverside Drive Multimodal Revitalization Corridor Project

Dear Ms. Chao:

We're writing to offer our support for the Lehigh Valley Planning Commission's request for a 2019 BUILD grant. The grant funding is imperative to the implementation of the more than \$50 million Riverside Drive Multimodal Revitalization Corridor project.

The collaboration of more than 20 local, public, private and non-profit organizations, Riverside Drive will be a 3.25-mile project that reclaims a vacant rail bed to become a centerpiece of a more than \$300 million brownfields redevelopment project known as the Waterfront, in the City of Allentown.

The two-lane thoroughfare, paired with a 10-foot hiking and biking commuter trail, will provide the connective tissue for a project that will include a Riverwalk, public plazas, floating docks and a Main Street through an office and housing development on the former site of the long-closed Lehigh Structural Steel. The project's ADA accessible design connects Allentown residents, commuters, recreational trail users and tourists from established commercial and mixed-use developments to the new cultural, recreational and smart growth redevelopment projects occurring along Allentown's waterfront.

It will close Pennsylvania's highest priority trail gap, providing a critical commuting link in the 165-mile Delaware & Lehigh National Heritage Corridor Trail network and offering an alternative travel option to regional trail systems. It improves connectivity between rural and urban areas of

the Lehigh Valley and eastern Pennsylvania, providing a new commuting corridor to job centers, while strengthening the spine of the region's recreational trail network. Whether linking workers to their jobs, rural to urban, consumers to the businesses, or goods to the deliverers - this investment transcends social and economic barriers.

We offer our support for a project we believe will not only provide greater access to all residents, but continue the rebirth of the Lehigh Valley's urban core. Phantoms Charities presented by Air Products is committed to contributing to projects that further revitalize downtown Allentown. In an effort to encourage and support a healthy and active lifestyle, Phantoms Charities created and installed the Urban Greenway, a two-mile fitness loop that connects downtown Allentown with its lush parks and convenient greenspaces. The mission of our Urban Greenway project is very much aligned with the work of this project as it encourages all types of people (residents and commuters) to be physical and active around our community. The project would enhance our trail route use and popularity by making it more accessible to all. Both projects would be highly beneficial for our community. We are in full support of this funding request.

The Urban Greenway is one of Phantoms Charities many projects and programs that empower our local community. Phantoms Charities presented by Air Products is the charitable arm of the Lehigh Valley Phantoms professional hockey team located at the PPL Center. Its mission is to strengthen our community by developing, instituting and operating charitable and education programs and services aimed at improving the lives of children and adults in the Lehigh Valley and the surrounding communities, with a special emphasis on youth health, fitness, sports and education.

Sincerely,

Jennifer Keeble
Executive Director
Phantoms Charities
