

SCENARIO 003
TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
BASE (NO-BUILD) SCENARIO

This scenario contains all existing roads as well as all major roads scheduled for improvement in the current Transportation Improvement Program (TIP). These roads include Route 33 extension, Route 412 improvements, American Parkway extension, Airport Area improvements, Route 222 Relocation, and Route 309 intersection improvements. The assumption is that the roads scheduled for improvement in the current TIP will all be completed by the year 2020.

This scenario is the 'Base' scenario against which all of the other improvement scenarios are compared.
