Appendix B - Resources for Planning Partners ....................................................................................140

Appendix C - Acronyms ..........................................................................................................................141
Transportation Planning

A. Purpose of the Guidebook

The purpose of this guidebook is to provide a high-level overview of the history and roles and responsibilities of Metropolitan Planning Organizations (MPOs) and Rural Planning Organizations (RPOs) in Pennsylvania. This information will allow transportation planning stakeholders at the state, regional, and local levels better understand the range of regional transportation planning activities for which MPOs and RPOs in Pennsylvania are responsible. This guidance document can serve to inform transportation planning stakeholders at all levels to support the consistent application of both federal and state transportation planning requirements.

This guidebook includes an overview of the history and summarizes the state and federal legislative directives for transportation planning organizations. A summary discussion of the role of the Pennsylvania Department of Transportation (PennDOT) and the Federal Highway Administration (FHWA) is included to illustrate the authority of the state and federal governments to direct transportation planning functions. The Guidebook addresses financial and programmatic obligations for PennDOT, as well as MPOs and RPOs. It is not an exhaustive list of all federal and state requirements for transportation planning; rather, it provides a summary of responsibilities and required activities, it identifies noteworthy practices, and provides individual profiles for each MPO, RPO, and Wayne County.

B. History of Transportation Planning

Transportation planning efforts undertaken by MPOs and RPOs must align with federal and state regulations. The following legislative timeline provides a summary of the requirements that authorize transportation planning and particular planning efforts that are to be undertaken by the MPOs and RPOs in Pennsylvania.
The legislation establishing a formal process for transportation planning occurred with the passage of the 1962 Federal-Aid Highway Act. The Act required urbanized areas to conduct transportation planning activities across political subdivisions. It also established the concept of “3C” planning, which is a Continuing, Comprehensive, and Cooperative effort undertaken by state and local governments to identify transportation projects in order to be considered eligible for federal funding.

In 1965, the Bureau of Public Roads (now the Federal Highway Administration) issued policy guidance requiring the creation of planning organizations in urbanized areas to lead transportation planning efforts based upon the 3C planning concept. The designation of what constitutes an Urbanized Area falls under the authority of the U.S. Census Bureau. Every 10 years and after the decennial census, the Census Bureau designates a new list of Urbanized Areas (UZAs). An UZA is defined as a geographic area with a population of 50,000 people or more. To receive Federal Aid, areas falling within the category of an UZA are required to designate a MPO for the entire urbanized area and the contiguous area expected to become urbanized within a 20-year forecast period.

Transportation planning expanded beyond highway networks with the passage of the Federal-Aid Highway Act of 1973, which increased funding for the Urban Mass Transportation Administration (now the Federal Transit Administration). The legislation strengthened the role and presence of transportation planning organizations, which now had a greater mandate to include and plan for transit systems.

From the enactment of the Federal-Aid Highway Act in 1956 to the early 1990s, the United States Congress continued to reauthorize federal support to complete the Interstate Highway System and allocate funding to the states. From the enactment of the Federal Highway Act of 1991 (ISTEA) when the Federal Government gave additional responsibilities and resources to local governments. The legislation gave state DOTs the discretion to designate planning entities for all areas across the state and focused on linking different modes of transportation.

In 1994 with the enactment of Pennsylvania Act 120, Local Development District Act, Pennsylvania established a partnership with seven regional planning organizations operating as Local Development Districts (LDDs) and serving 52 counties in Pennsylvania. With this legislation, PennDOT authorized the allocation of funding and assigned responsibilities to LDDs to undertake transportation planning activities. Some of these LDDs function as RPOs, while other areas have developed over time dividing the LDDs into various MPOs and RPOs.
On July 6, 2012, new federal legislation transformed policy and programmatic procedures and created a streamlined
and performance-based surface transportation program called the Moving Ahead for Progress in the 21st Century Act
(MAP-21). MAP-21 was a milestone for the Nation’s surface transportation program and built on many of the highway,
transit, bike, and pedestrian programs and policies established in 1991.

Pennsylvania Act 89 of 2013, the current legislation authorizing transportation funding in Pennsylvania, became law
on November 25, 2013. This legislation replaced the former Pennsylvania transportation legislation Act 44 of 2007.
The legislation increased funding for transportation by $2.3 billion and set forth new funding allocations, devised a new framework for funding county and local government projects, and approved new rules to expand Liquid Fuel allocations for locally owned roads and bridges. Additionally, increases to driver license fees and traffic violations generated new funding sources, some of which are dedicated to public transit.

Act 89 eliminated the funding obligation of the Pennsylvania Turnpike Commission, established under Act 44. The $250 million obligation is phased out over an eight-year period and replaced with the newly created revenue streams generated through fee increases.

Local governments received several new considerations in Act 89. While Act 89 addressed all modes of transportation, it added a new category authorizing funding for Dirt, Gravel, and/or Low-Volume Roads. It also added $220 million a year (a 60% increase from previous years) for local roads and bridges. Act 89 authorizes counties to assess a $5 vehicle registration fee that is to be used as a revenue stream for local and regional highway and bridge needs.

Act 89 addressed transportation from a multi-modal perspective and established a new PennDOT Deputy Secretary for Multi-Modal Transportation. Under the new legislation, this position would be responsible for Transit, Aviation, Passenger Rail, Rail Freight, and Ports. A Statewide multi-modal fund was created to address capital needs for non-highway projects including projects that coordinate land use and transportation, projects related to pedestrian mobility and safety, projects that improve connectivity, and transit-oriented development. Act 89 also emphasized the importance of transit and the need for consolidation and cooperation. PennDOT now has the authorization to develop a Shared Ride Pilot Program that will explore delivery and payment options to enhance community service.

Enacted on January 6, 2015, the Fixing America’s Surface Transportation Act (FAST Act) continued the transportation planning process and structure along with the funding approach established in MAP-21. FAST Act authorized $305 billion over fiscal years 2016 through 2020 for highway, highway and motor vehicle safety, public transportation, motor carrier safety, hazardous materials safety, rail, and research, technology, and statistics programs.

FAST Act continues requirements for metropolitan transportation planning with the caveat that long-range statewide and metropolitan plans are now required to address intercity transportation, including intercity buses and commuter vanpools.

The FHWA and FTA work with PennDOT and the MPO/RPOs to review and approve transportation projects and plans, including the Twelve Year Program.

At the date of this publication (2017), PennDOT recognizes 24 planning regions within Pennsylvania that encompass both urbanized and rural areas and one independent county. Twenty-three are either an MPO or RPO, while Wayne County is a non-affiliated independent county for which PennDOT assumes responsibility for the transportation planning and programming duties.

C. Federal Authority and Role

i. Federal Highway Administration (FHWA)
The FHWA is a U.S. Department of Transportation Agency that provides financial and technical assistance to State and local governments in the design, construction, and maintenance of the Nation’s highway system (Federal Aid Highway Program) and various federally and tribal owned lands (Federal Lands Highway Program).

The FHWA Pennsylvania Division provides front line Federal-aid program delivery assistance to partners and customers in highway transportation and safety services, including but not limited to, planning and research, preliminary engineering, technology transfer, right-of-way, bridge, highway safety, traffic operations, environment, civil rights, design construction and maintenance, engineering coordination, highway beautification, and administration.

ii. Federal Transit Administration (FTA)
The Federal Transit Administration (FTA) oversees funding and delivery of technical assistance to enhance mass transportation. The focus on transit-related services began in the early 1960s and led to the creation of the Urban Mass Transportation Administration in 1964. The agency was renamed to FTA in 1991 to respond to the need to improve mobility for rural areas and people with disabilities.
Pennsylvania’s Metropolitan Planning Organizations and Rural Planning Organizations

GUIDEBOOK FOR
Pennsylvania’s Metropolitan Planning Organizations
and Rural Planning Organizations

PennDOT Engineering Districts are directly responsible for the state-maintained transportation system. Engineering Districts across Pennsylvania participate in the planning, design, construction and maintenance of the road and bridge network. PennDOT District staff serve as liaisons to local municipalities, residents, and stakeholders to ensure that the movement of people and goods happens safely and efficiently in each region of Pennsylvania.

PennDOT Central Office includes five (5) deputates each of which are assigned specific roles and responsibilities.

- **Administration** – Responsible for general management of PennDOT including facilities, employment, and Pennsylvania Welcome Centers.
- **Driver & Vehicle Services** – Responsible for issuing driver’s licenses, vehicle registration, and management of over 95 driver license facilities.
- **Highway Administration** – This deputate is the largest within PennDOT and oversees design, construction, maintenance, and engineering activities across Pennsylvania’s 11 engineering districts.
- **Multimodal Transportation** – Established in 2013 with the enactment of Act 89, this deputate is responsible for aviation, rail freight, public transportation, ports, and pedestrian and bicycle programs.
- **Planning** – This deputate is responsible for preparing for future transportation needs and supporting decision-making. The deputate is responsible for coordinating with federal and local organizations to plan for and fund transportation improvements.

PennDOT employs approximately 12,000 people across the Commonwealth. The agency’s Central Office is located in the state capital of the City of Harrisburg and regional offices are located in formally designated Engineering Districts. Additionally, each Engineering District manages maintenance facilities located in each of Pennsylvania’s 67 counties.

**D. Pennsylvania Authority and Role**

**i. Pennsylvania Department of Transportation (PennDOT)**

Established in 1970 by Act 120, the Pennsylvania Department of Transportation (PennDOT) is responsible for the planning, funding, construction, and maintenance of a transportation network that is the fifth largest in the nation. Today PennDOT is responsible for approximately 40,000 miles of state roads and highways and over 25,000 state bridges. Integral to this role is the responsibility for transportation planning, programming, and project implementation for a total of 120,000 miles of state and local highways and 32,000 state and local bridges. 

A few of PennDOT’s core planning functions include, but are not limited to:

- Prepare and Maintain a Long-Range Statewide Transportation Plan
- Develop a Statewide Transportation Improvement Program
- Identify performance measure targets and monitor whether implemented projects are achieving targets
- Involve the public

PennDOT employs approximately 12,000 people across the Commonwealth. The agency’s Central Office is located in the state capital of the City of Harrisburg and regional offices are located in formally designated Engineering Districts. Additionally, each Engineering District manages maintenance facilities located in each of Pennsylvania’s 67 counties.

---

Source: ESR, PennDOT 2017

For a full size image please click [here](#).
Within the Planning Deputate there are three (3) sections as follows:

- Bureau of Planning and Research
- Center for Program Development and Management
- Office of Public Private Partnerships

The Center for Program Development and Management (Program Center) is responsible for coordination and oversight of the MPO and RPO transportation planning efforts. The Program Center through the Transportation Program Development Division has the following obligations:

- Engaging with 24 Planning Partners (the 23 MPOs/RPOs, and independent county Wayne County)
- Developing and managing Pennsylvania’s Twelve Year Program
- Coordination with counties and transportation planning organizations for long and short range planning
- Coordination with FHWA, FTA and the Environmental Protection Agency for long and short range planning

---

ii. State Transportation Commission (STC)

**Act 120 of 1970** established the State Transportation Commission (STC) to serve in an advisory role to the newly established Pennsylvania Department of Transportation. The legislation outlined the purpose of the STC including the organizational structure, membership, and responsibilities. STC and PennDOT determine and evaluate the condition and performance of Pennsylvania’s transportation system in order to effectively assess the resources required to preserve, restore, extend and expand transportation facilities and services.

PennDOT and STC work together with the MPOs and RPOs on several transportation planning efforts including, but not limited to:
- The Statewide Transportation Improvement Program (STIP)
- The Twelve Year Transportation Program (TYP)
- The Statewide Long Range Transportation Plan (LRTP)
- Conducting special studies and reports

Under Federal Law, the state is required to prepare the **Statewide Transportation Improvement Program (STIP)**, which is a four-year plan that identifies highway, bridge, and transit projects that will use federal funds. The TYP reflects regional and local priorities as identified through 24 separate Transportation Improvement Programs (TIP) completed in Pennsylvania. MPOs and RPOs each develop their TIP, which is incorporated into the STIP.

Under state law the STC is required to review and update the Twelve Year Program (TYP), every two (2) years. The TYP is the state’s official transportation program and is a fiscally-constrained plan for transportation improvements over a 12-year period. The Twelve Year Program is divided into four-year periods with the first four years corresponding to the Statewide Transportation Improvement Program (STIP) and the Transportation Improvement Programs created at the local level. The **Twelve Year Program** allocates funding across various transportation categories including state highways and bridges, public transit, rail, aviation, and multi-modal projects.

A **Statewide Long Range Transportation Plan (LRTP)** is a 20-year (minimum) planning document used to anticipate and prepare for future transportation needs. **On Track** is the current Statewide Long Range Transportation Plan for Pennsylvania. For the first time, the Pennsylvania LRTP addresses freight movements in a companion document titled **Pennsylvania Comprehensive Freight Movement Plan.** PA on Track also formalizes state policy to collaborate with its Planning Partners to identify performance measure targets.

---

iii. Transportation Planning Programmatic Considerations

a. Financial Management

PennDOT plays an important role in allocating funding appropriately and must demonstrate that projects are fiscally constrained. Essential to this effort is the Transportation Program Financial Guidance, which includes but is not limited to funding targets, revenue growth rates, inflation, and project costs. The **Pennsylvania Transportation Program Financial Guidance** document is the result of a collaborative effort between FHWA, FTA, PennDOT, STC, and the MPOs and RPOs serving the Commonwealth. Additional information regarding funding eligibility and options can be found in **PennDOT Publication 746, Local Project Delivery Manual.**
b. Performance Based Planning and Programming and the Role of Asset Management
The FHWA defines asset management as a “systematic process of maintaining, upgrading, and operating physical assets cost-effectively.” From a transportation perspective, assets commonly include bridges, roads, signs, highway facilities, Intelligent Transportation Systems (ITS), traffic signals, and equipment fleet. FHWA’s website offers additional guidance regarding Performance Based Planning including the Performance Based Planning and Programming Guidebook. A summary of the FHWA Performance Measures, including the criteria, penalties, and required due dates can be found in Appendix A.
PennDOT collaborates with various stakeholders in the process of Asset Management as follows:
- PennDOT works with MPOs/RPOs as they participate in transportation planning efforts at the regional and state levels to prioritize projects and funding for state assets.
- PennDOT coordinates with county and municipal governments in many ways including funding and joint maintenance of state assets. It should be noted that counties and municipalities are responsible for maintaining locally owned roads and bridges as well as traffic signals, signal timings, signs (road name signs, speed limit signs, and stop signs), and pavement markings. PennDOT does not oversee local asset management efforts and, currently, there is no state legislation requiring local asset management programs.

ii. Municipal Government
The Commonwealth of Pennsylvania is comprised of individual units of government that are distinct and operate independently from one another but under the authority of the state. The sheer number of municipalities presents unique challenges to state agencies responsible for directing infrastructure investments and planning for new projects. As of 2017, there were 2,560 separate municipal political subdivisions with the authority to enact laws, control land use, and plan for development. These all have a distinct governing structure as determined by the Commonwealth of Pennsylvania's Local Government Laws.

E. Local Government Roles and Authority

i. County Government
There are 67 counties within the Commonwealth of Pennsylvania. Counties play an important role in the governance of Pennsylvania and have many responsibilities including, but not limited to, assessment of real estate tax, provision of critical human and social services, emergency management and comprehensive planning. Many counties are also responsible for funding and/or operation of mass transit systems and the maintenance of transportation infrastructure including bridges.

Counties assist MPOs and RPOs in a variety of matters, including, but not limited to:
- Providing assistance in preparing the Unified Planning Work Program (UPWP)
- Providing transportation problem identification and possible projects for consideration in the Transportation Improvement Program (TIP) and Long Range Transportation Plan (LRTP) processes
- Providing local transportation project priorities to assist development of the TIP and LRTP
- Providing local data as needed to assist with project or plan development
- Coordinating on local asset management efforts
For more information on the role of County Government, visit the County Commissioners Association of Pennsylvania.

PennDOT’s County Liquids Fuels Program is available to support maintenance and construction efforts on locally owned roads and bridges. For more information see Policies and Procedures for the Administration of the County Liquid Fuels Tax Act of 1931 and Act 44 2007 and the Liquid Fuels Tax Act 655, 1956, as amended.

ii. Municipal Government
The Commonwealth of Pennsylvania is comprised of individual units of government that are distinct and operate independently from one another but under the authority of the state. The sheer number of municipalities presents unique challenges to state agencies responsible for directing infrastructure investments and planning for new projects. As of 2017, there were 2,560 separate municipal political subdivisions with the authority to enact laws, control land use, and plan for development. These all have a distinct governing structure as determined by the Commonwealth of Pennsylvania's Local Government Laws.

Municipalities coordinate with MPOs and RPOs in a variety of matters, including, but not limited to:
- Providing transportation problem identification and possible projects for consideration in the Transportation Improvement Program (TIP) and Long Range Transportation Plan (LRTP) processes
- Providing local transportation project priorities to assist development of the TIP and LRTP
- Providing local data as needed to assist with project or plan development
For more information visit Local Government Laws or the Pennsylvania Department of Community and Economic Development’s Citizen’s Guide to Pennsylvania Local Government.
The **Municipal Liquid Fuels Program** funds a range of projects to support construction, reconstruction, maintenance and repair of public roads or streets. To be eligible to receive funding, municipalities must follow procedures outlined by PennDOT and submit various reports documenting activities. For more information see Chapter 2 of the **Policies and Procedures for the Administration of the County Liquid Fuels Tax Act of 1933 and Act 44 2007 and the Liquid Fuels Tax Act 655, 1956, as amended**.

The Liquid Fuels allocation for a municipality is determined by its population and miles of roads, which must be included on an approved Liquid Fuels Inventory. The following criteria apply:

- The road must have minimum of 33' right-of-way in a township and 16' in a borough.
- The “cartway” (drivable surface) must be a minimum width of 16', and the road must be a minimum of 250' in length.
- If the road is a dead end, it must have cul de sac (turnaround) at the end with a minimum 40' radius.
- To continue to receive Liquid Fuels funds, a road must be maintained in such a condition that it can be driven safely at 15 mph.

### F. Transportation and Planning Funding

Funding for transportation planning and programming primarily comes from federal sources. State DOTs typically manage and distribute these funds, although transit funding may go directly to the designated transit operator in large urbanized areas. State funding, private investments, and local assessments, such as impact fees or taxes, also augment federal funds. Federal agencies that are most often associated with transportation funding include:

- Federal Highway Administration (FHWA)
- Federal Transit Administration (FTA)
- Federal Aviation Administration (FAA)
- Federal Railroad Administration (FRA)

Federal allocation of transportation dollars follows a process that begins first with the legislation necessary to identify the appropriate mechanism to distribute the funding. For instance, in 2015 with the enactment of the FAST Act, over $300 billion dollars from 2016 through 2020 was authorized for highway, highway and motor vehicle safety, public transportation, motor carrier safety, hazardous materials safety, rail, and research, technology, and statistics programs. Once a funding mechanism is established, the annual budget process provides the allocation to specific agencies, all of which will have specific criteria that align to Federal goals and policies. Each year, Congress sets forth a federal budget that includes appropriations to various programs and/or agencies.

PennDOT oversees most regional and local allocations for federal and state funding dedicated to transportation investments according to Commonwealth priorities and needs. Allocations to specific projects must be identified in the STIP and be consistent with the long range plans of MPOs and RPOs and Statewide LRTP. Most federally and state funded projects require a local financial match and will have certain eligibility requirements.

Examples of federal funding highway programs include:

- **The Surface Transportation Block Grant Program (STBG)**
- **The Congestion Mitigation and Air Quality (CMAQ) Improvement Program**
- **The National Highway Performance Program (NHPP)**

Federal funding is also available to support planning and research efforts by state DOTs and MPOs and RPOs. Sources include:

- **State Planning and Research (SP&R)**
- **Metropolitan Planning Funds**

### G. Performance Measures

The FHWA defines **Performance Measurement** as “the use of statistical evidence to determine progress toward specific defined organizational objectives; however, the concept of performance measurement has changed over the years to reflect advances in planning and shifts in policy.”

Performance based planning is a systematic approach to gather information, assess needs, determine impacts and communicate information in order to set policy and direct funding to achieve established goals. State DOTs are required to comply with 23 USC § 130 - National goals and performance management measures – in order to be eligible to receive federal funding for transportation.

There are seven National Goals established by Title 23:

1. Safety
2. Infrastructure Condition
3. Construction Reduction
4. System Reliability
5. Freight Movement and Economic Vitality
6. Environmental Sustainability
7. Reduced Project Delivery Delays

The FHWA provides guidance in the form of **Final Rules** for State DOTs to meet these standards, which were established by MAP-21 and the FAST Act. The Final Rules outline expectations and procedures for State DOTs in the following areas:

1. **Pavement and Bridge Condition Performance Measures Final Rule**
2. **System Performance/Freight/CMAQ Performance Measures Final Rule**
3. **Highway Safety Improvement Program (HSIP) and Safety Performance Management Measures Final Rules**
4. **Planning Final Rule**
5. **Asset Management Plan Final Rule**
6. **Transit Asset Management (TAM) Final Rule**
7. **Public Transportation Safety Program Final Rule**
By law, an MPO is defined as a policy board comprised of local elected officials. Representatives from local governments and transportation agencies serve on MPOs and perform the six core functions:

- Establish a setting for effective decision making
- Identify and evaluate transportation improvement options
- Develop and update a LRTP for the metropolitan area covering a planning horizon of at least 20 years
- Develop a TIP
- Identify performance measure targets and monitor whether implemented projects are achieving targets
- Involve the public

An MPO shall be designated for each urbanized area with a population of more than 50,000 individuals. The FHWA and the FTA shall identify as a Transportation Management Area (TMA) each urbanized area with a population of over 200,000 individuals. The designation of TMAs triggers additional duties for an MPO including the development of a Congestion Management Plan.

In Pennsylvania, a Rural Planning Organization (RPO) assumes the role of a Regional Transportation Planning Organization (RTPO). A RTPO is a voluntary group of nonmetropolitan area local officials and transportation system operators that assemble to assist in the Statewide and non-metropolitan transportation planning process identified as part of the FAST Act.

PA Act 120, Local Development District Act, (1994) established a partnership with seven regional planning organizations operating as Local Development Districts (LDDs) and serving 52 counties in Pennsylvania.

A Memorandum of Understanding (MOU) between PennDOT and each LDD formalizes the relationship and specifies the roles and activities for the state and LDD.
Federal requirements do not specify the organizational structure of either an MPO or RPO in terms of staff or administrative oversight. An MPO or RPO can be County based, Municipal based, hosted by a Council of Governments (COG), or as an independent organization. For example, a single county or a multi-county Council of Governments may serve as the fiscal agent with the authority to hire and manage employees while others are an independent entity.

Federal regulations do require the creation of a policy board (23 CFR 450.104) to carry out the metropolitan planning process. In Pennsylvania MPOs and RPOs often refer to their Policy Board as the “Coordinating Committee” or “Planning Committee.” An MPO or RPO may also create other committees to provide technical and/or advisory guidance.

Staffing levels and personnel support for an MPO or RPO will also vary according to need and available resources. Staff and hired consultants will provide technical support to complete planning activities and determine future transportation projects to support the transportation planning process.

A. Required Activities

Together the MPOs, RPOs and PennDOT share responsibility for developing and updating the required transportation planning activities and plans as shown in the Transportation Planning Activity Schedule.

**TRANSPORTATION PLANNING ACTIVITY SCHEDULE**

The timeframes listed are when the preparation and updates of these activities are best suited to occur. However, these activities may be an ongoing process.

The timeframes listed are when the preparation and updates of these activities are best suited to occur. However, these activities may be an ongoing process.
The following section provides a summary of the required transportation planning activities and includes links to the appropriate legislation and other additional informational resources.

i. Statewide Long Range Transportation Plan (23 CFR 450.216)

The Statewide Long Range Transportation Plan (LRTP) is a method by which the state documents its plan to direct funding over a minimum of a 20-year horizon for transportation planning, programming, and maintenance. It serves as a visioning document and should include capital, operations and management strategies, investments, procedures and other measures to ensure the preservation and most efficient use of the existing transportation system that is based upon a collaborative process with MPOs and RPOs. PennDOT is responsible for preparing the Statewide LRTP. However, MPOs and RPOs can be involved in this process by providing input through the statewide process, working with Central Office and in general development of plans that support or influence the statewide priorities.

The LRTP is a forward-looking document that must address the Federal planning factors described in section 167 of title 23; program goals described in section 70103 of title 49; critical rural and urban freight corridors designated within the State under section 167 of title 23; and for those facilities that are State owned or operated, a description of the strategies the State is employing to address freight mobility issues.

A description of the freight policies, strategies, and performance measures that will guide the freight-related transportation investment decisions of the State; when applicable, a listing of multimodal critical rural freight facilities and corridors designated within the State under section 70103 of title 49; and a description of how the State will maximize federal funding. The Statewide Freight Plan must be, at a minimum, updated every five years and address the following:

- An identification of significant freight system trends, needs, and issues with respect to the State;
- A description of the freight policies, strategies, and performance measures that will guide the freight-related transportation investment decisions of the State;
- When applicable, a listing of multimodal critical rural freight facilities and corridors designated within the State under section 70103 of title 49 (National Multimodal Freight Network); critical rural and urban freight corridors designated within the State under section 167 of title 23 (National Highway Freight Program);
- A description of how the plan will improve the ability of the State to meet the national multimodal freight policy goals described in section 70101(b) of title 49, United States Code and the national highway freight program goals described in section 167 of title 23;
- A description of how innovative technologies and operational strategies, including freight intelligent transportation systems, that improve the safety and efficiency of the freight movement, were considered;
- In the case of roadways on which travel by heavy vehicles (including mining, agricultural, energy cargo or equipment, and timber vehicles) is projected to substantially deteriorate the condition of the roadways, a description of improvements that may be required to reduce or impede the deterioration;
- An inventory of facilities with freight mobility issues, such as bottlenecks, within the State, and for those facilities that are State owned or operated, a description of the strategies the State is employing to address those freight mobility issues;
- Consideration of any significant congestion or delay caused by freight movements and any strategies to mitigate that congestion or delay;
- A freight investment plan that, subject to 49 USC 70202(c), includes a list of priority projects and describes how funds made available to carry out 23 USC 167 would be invested and matched; and
- Consultation with the State Freight Advisory Committee, if applicable.

PennDOT is responsible for preparing the Statewide Freight Plan. MPOs and RPOs can assist PennDOT in this process by engaging in the development process, highlighting or identifying key freight attractors and generators in their regions and encouraging public input and engagement at a grass roots level. They can also develop standing committees that focus on ongoing freight topics and issues in the region that can flow up to the statewide freight plan and incorporate state and federal objectives regarding freight. MPOs and RPOs can develop regional freight plans for their regions.

Federal guidance on State Freight Plans is published in the Federal Register and located here PennDOT’s Statewide Freight Plan and identifies strategies to improve freight access across the Commonwealth.

iii. Statewide Transportation Improvement Program (STIP) (23 CFR 450.218)

Every two years, PennDOT updates the Statewide Transportation Improvement Program (STIP), which is a compilation of TIPs prepared at the local level by the MPOs and RPOs as well as statewide programs and projects that include interstate management, safety, and other projects. Each is included into the STIP and represents the first four years of the TYP.

iv. Transportation Improvement Program (TIP) (23 CFR 450.326)

MPOs are required to prepare a Transportation Improvement Program (TIP) and submit to PennDOT for approval. RPOs are required to develop a TIP in cooperation with PennDOT. The TIP is a short-term (4-year) planning document that is used as the basis of the Statewide TYP. TIPs are updated every two years in concert with the TYP.

The MPOs and RPOs, PennDOT and FHWA all have a role in developing the TIP. The TIP chart on the following page outlines the roles and responsibilities of each party, as well as the general order of events that occur during the development of the TIP.

v. Long Range Transportation Plan (LRTP) (23 CFR 450.32A)

To receive federal funding for transportation projects, MPOs and RPOs are required to document existing conditions and forecast future needs (no less than 20 years) with a Long Range Transportation Plan (LRTP). All transportation projects must be fiscally constrained and not exceed the expected level of funding that the MPO/RPO is allocated. The LRTP is a forward-looking document that must address the Federal planning factors including:

- Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency;
- Increase the safety of the transportation system for motorized and non-motorized users;
- Increase the security of the transportation system for motorized and non-motorized users;
- Increase accessibility and mobility of people and freight;
- Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns;
- Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;
- Promote efficient system management and operation;
- Emphasize the preservation of the existing transportation system;
- Improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation; and
- Enhance travel and tourism.

### Federal/State Collaborations

#### FHWA/FTA
- Participate in financial guidance and general procedural guidance work groups
- Draft financial guidance is issued to MPO/RPOs
- Draft general procedural guidance is issued to MPO/RPOs
- STC Meeting to review TIP development
- Develop Statewide STIP MOU

#### STC
- Public outreach to support development of TIP
- Issue final financial guidance documents to MPO/RPOs
- Issue final general procedural guidance
- Provide draft Interstate Management Program projects to MPO/RPOs
- Provide final spike decisions to MPO/RPOs and Districts
- MPO/RPOs review highway, bridge, and transit projects

### PennDOT Central Office

#### PennDOT Central Office
- Participate in financial guidance and general procedural guidance work groups
- Provide updates of scopes, costs, and schedules for carryover projects to MPO/RPOs
- Provide updates of scopes, costs, and schedules for all carryover and candidate projects to MPO/RPOs
- PennDOT Connects Coordination complete for new and carryover projects

### PennDOT District

#### PennDOT District
- Participate in financial guidance and general procedural guidance work groups
- MPO/RPOs review highway, bridge, and transit projects
- MPO/RPOs “Board” meet to discuss schedule and guidance, set TIP approval meeting dates for Year 2
- MPO/RPOs begin development of draft TIP

### Other Agency Coordination

#### Other Agency Coordination
- Ongoing Coordination Meetings with other transportation planning and resource agencies to occur as needed

### Local Government Coordination

#### Local Government Coordination
- PennDOT Connects Coordination complete for new and carryover projects
### Year 2

#### Winter

- **TIP Review**
- **TIP Negotiation**

#### Spring

- **Air Quality Conformity Analysis**

#### Summer

- **Environmental Justice**
- **MPO/RPO TIP Approval**
- **Public Comment**
- **STIP Integration**

#### Fall

- **Approved TIP**

### Federal/State Collaborations
- Air quality consultation initiated interagency meeting FHWA, FTA, PennDOT, PaDEP, USEPA

### FHWA/FTA
- **Finalize Statewide STIP MOU**
- **FHWA coordinates with USEPA on air quality conformity documents**
- **FHWA/FTA review TIPs and approve the STIP**

### STC
- **Complete review draft TIP to ensure priorities are reflected, fiscal constraint, year of expenditure are met, project phases are accounted for and programmed in the proper year**
- **Finalize Statewide STIP MOU**
- **Develop and finalize all MPO/RPO TIP MOU**
- **STC approves STIP and TYP**

### PennDOT Central Office
- **Complete review draft TIP to ensure priorities are reflected, fiscal constraint, year of expenditure are met, project phases are accounted for and programmed in the proper year**
- **Finalize Statewide STIP MOU**
- **Conduct individual meetings with MPO/RPOs and PennDOT District Office to review and select candidate projects. CO submits program revisions to MPO/RPOs and shares information with FHWA/FTA, and District Office**
- **PennDOT Central Office accepts the MPO/RPOs TIP, as a component of the STIP and submits to STC for approval**
- **After STC approval, PennDOT Secretary/Governor submits STIP to FHWA/FTA for review and approval**

### PennDOT District
- **MPO/RPOs complete development of draft TIP and submit to PennDOT (CO & District) & FHWA/FTA**
- **MPO/RPOs begin EJ activities**
- **MPO/RPOs complete air quality conformity analysis in coordination with PennDOT**
- **MPO/RPO and PennDOT Central Office develop and finalize MPO/RPO TIP MOU**

### MPO/RPOs
- **MPO/RPOs complete joint public comment periods on the STIP/TIP including conformity determinations and EJ**
- **MPO/RPOs complete EJ activities and summarize the impact to minority or low-income groups**
- **MPO/RPOs Public Comment period in accordance with the MPO/RPOs Public Participation Plan and the PennDOT minimum 30-day public comment period requirements on TIP in coordination with PennDOT STIP**
- **MPO/RPOs formally approve TIP, complete the TIP checklist and submit to Central Office**

### Other Agency Coordination
- **Ongoing Coordination Meetings with other transportation planning and resource agencies to occur as needed**

### Local Government Coordination
- **Ongoing Coordination Meetings as needed**
LONG RANGE TRANSPORTATION PLAN (LRTP)
This schedule is developed assuming a four year update cycle. For areas with five year update cycle, this schedule would simply have an additional year 1 or 2 that would indicate continued coordination with local priorities and development and execution of the TIP.

<table>
<thead>
<tr>
<th>Year 1 (and 2 if 5 year update)</th>

**STC**
- Conduct after action review of the MPO/RPO LRTP process and plan with FHWA
- Annual setting of performance measure: target setting, data collection, data analysis and progress reporting

**PennDOT Central Office**
- Conduct after action review of the MPO/RPO LRTP process and plan with FHWA
- Annual setting of performance measure: target setting, data collection, data analysis and progress reporting

**PennDOT District**
- Execution and integration of recently adopted long range plan. These initiatives could include:
  - Ensure collaboration with all entities in development of projects
  - Furthering outreach and communication of the plan through various media and outreach
  - Begin/continue solicitation for next plan update
  - Annual setting of performance measure: target setting, data collection, data analysis and progress reporting

**MPO/RPOs**
- Visioning, goal setting, incorporation of Federal and statewide goals and initiatives
- Develop schedule for updating and adopting LRTP

**Other Agency Coordination**

**Local Government Coordination**

<table>
<thead>
<tr>

- **Other Agency Coordination**
- **Local Government Coordination**
- **MPO/RPOs**
The LRTP is updated at least every four (4) years in air quality nonattainment and maintenance areas and at least every five (5) years in attainment areas.

If a conformity determination for the LRTP is not made by an applicable deadline and such failure is not corrected by either adding measures to reduce motor vehicle emissions or taking other needed actions sufficient to reestablish conformity within 12 months after such deadline, the LRTP shall lapse (i.e., an area has a 12-month “grace period” to reestablish conformity before facing a plan lapse).

- The term ‘lapse’ means that the conformity determination for a transportation plan is no longer valid, and thus there is no currently conforming transportation plan or transportation improvement program.

An LRTP can expire if it has not been updated to meet the federal planning requirements within the designated update timeframe. LRTP expirations mean no new TIPs or TIP amendments can be included in the STIP for project implementation. A plan expiration also results in a conformity lapse subject to the “grace period” discussed in the previous bullet.

If an LRTP lapses in a non-attainment/maintenance area, the MPO or RPO must develop/adopt an “Interim” LRTP and TIP so the FHWA and FTA can make approvals or grants limited to:

- Projects that are exempt from the conformity process (pursuant to 40 CFR 93.126 and 93.127 of the conformity rule) such as safety projects, and Transportation Control Measures (TCMs) included in approved SIPs.
- Only those project phases, which have received approval of the project agreement, and transit projects that have received a full funding grant agreement (FFGA), or equivalent approvals, prior to the conformity lapse may proceed during a conformity lapse.

If an LRTP is expected to expire before an update is ready for adoption,

- The MPO or RPO must show a good faith effort to complete the LRTP update in an expeditious manner.
- In attainment areas, projects in the current TIP can advance, but the TIP cannot be amended or adopted until the updated LRTP is completed/approved by the MPO or RPO.
- The expiring LRTP can be updated on an “interim” basis if plan goals/policies, demographic and financial information, traffic forecasts, and project listings do not require major revisions address no less than a 20-year planning horizon at the time of MPO or RPO Board “reaffirming” the expiring LRTP. This could still result in a conformity lapse in non-attainment/maintenance areas, depending upon conformity update cycle and the allowed grace period.

A short-term, “Interim” plan or reaffirming the expiring LRTP can be adopted by the MPO or RPO Board to allow TIP amendments to proceed, after consultation with other planning partners, the public, and FHWA/FTA.

LRTP: Summary of Required Elements

- Minimum 20 year planning horizon
- Long and short-range strategies/actions for integrated multimodal transportation system
- Description of performance measures and performance targets and a system performance report
- Current and projected forecast of future conditions and needs
- A financial plan

The MPOs, RPOs and PennDOT all have a role in developing the LRTP. The LRTP chart outlines the roles and responsibilities of each party, as well as the general order of events that occur during the development of the LRTP.

vi. Twelve Year Transportation Program (TYP)

MPOs and RPOs work cooperatively with PennDOT to prepare a Twelve Year Transportation Program (TYP) that is approved by the State Transportation Commission (STC). The TYP is a fiscally-constrained program that identifies transportation improvements over a 12-year period and is updated every two years. Act 120, of 1970, requires PennDOT to prepare and submit, biannually, a list of recommended transportation projects for the next twelve years to the STC for their consideration and approval. In the course of preparing the TYP, PennDOT undertakes a public input process that is comprehensive and includes multiple stakeholders and reviews.

To assist PennDOT in the preparation of the TYP, MPOs and RPOs can engage in data analysis and support project need development in planning which can evolve through the LRTP and TIP process in problem identification and possible projects for consideration in the TYP. This process can be encouraged through the use of technical committees at the MPO and RPO level to engage local transportation stakeholders in this development process. Prioritization of these projects and communication of those priorities and how they meet local, state and federal goals is a key part of this process.

vii. Unified Planning Work Program (UPWP) (23 CFR 450.308)

MPOs are federally required to prepare an annual Unified Planning Work Program (UPWP). In Pennsylvania, RPOs are also obligated to develop UPWPs. The UPWP includes a description of the planning work and resulting products, who will perform the work, time frames for completing the work, the cost of the work, and the source(s) of funds. UPWPs are developed as 2-year programs and in the second year any changes are supplemented/amended as part of the 2-year agreement. The exception is DVRPC, which (by Interstate Compact) is required to update their budget/UPWP every year by March 15th.

viii. State Planning & Research Work Program (23 CFR 420 & 23 USC 505)

To be eligible for federal State Planning and Research (SPR) funds, state DOTs must prepare a management plan for how they will conduct research, development and technology (RD&T) activities. Authorized by Title 23, U.S. Code, Section 505, and regulated by Title 23, Code of Federal Regulations (CFR), Part 420; these funds are used by PennDOT in a variety of ways to facilitate statewide and MPO and RPO transportation planning activities and address transportation issues to achieve Commonwealth goals. Federal guidance can be found in the State Planning and Research Guide. The most recent work plan (2016-2018 Transportation Planning and Research Work Program) was prepared by the Office of Planning.

PennDOT is responsible for preparing the management plan for the SPR Work Program. MPOs and RPOs can assist PennDOT in this process by educating stakeholders on the benefits and programs executed by SPR as well as developing topics and research areas that are important to the local transportation stakeholders.
ix. Regional Air Quality Conformity Analysis (93 CFR Parts 51 and 93 & 23 CFR 450.324 (d) and 450.326(f))

The Clean Air Act (CAA) established air quality standards and requirements for transportation projects that states must follow. Under the CAA transportation and air quality modeling procedures must be coordinated to ensure that the TIP and the LRTP are consistent with the area’s applicable State Implementation Plan (SIP). The SIP is a federally approved and enforceable plan by which each area identifies how it will attain and/or maintain the health-related primary and welfare-related secondary National Ambient Air Quality Standards (NAAQS).

The Pennsylvania Local Development District Act 120 of 1994 also requires that transportation projects using state or federal funding must be evaluated for potential impact – including air quality. Areas deemed to be nonattainment or maintenance areas for air quality must complete a regional conformity analysis for projects included on the TIP and/or LRTP. The purpose is to ensure that transportation projects achieve air quality goals specified for the region.

In preparing the conformity analysis, depending on conformity status, MPOs and RPOs are responsible for supporting or executing the air quality conformity status as part of LRTP and TIP updates. If a travel demand model exists in a region, this is often the most effective tool to complete this analysis. PennDOT is responsible for partnering in this process and assuring that the TIPs are in conformance as well as the conformity of the STIP.

In Pennsylvania, PennDOT and several MPOs are responsible for air quality conformity including:
1. Cambria County / Johnstown Area Transportation Study MPO
2. Carbon County / Northeastern Pennsylvania Alliance MPO
3. Delaware Valley Regional Planning Commission MPO
4. Harrisburg Area Transportation Study MPO
5. Lancaster County Transportation MPO
6. Lebanon County MPO
7. Lehigh Valley Transportation Study MPO
8. Reading Area Transportation Study MPO
9. Southwestern Pennsylvania Commission MPO
10. York Area MPO

For additional information, refer to PennDOT Project Review and Classification Guidelines for Regional Air Quality Conformity (March 2014) and PennDOT Project-Level Air Quality Handbook, Publication 321.

x. Public Participation Plan (23 CFR 450.316)

The Public Participation Plan outlines a process by which the MPO or RPO will ensure adequate involvement of local residents, service providers, businesses, elected officials, and other stakeholders. The plan must identify how the MPO/RPO will notify the public of meetings, ensuring access to meetings, and demonstrating how they will consider and respond to public input. The FHWA provides guidance to MPOs and RPOS regarding public participation requirements.

The Public Participation Plan must comply with Title VI of the Civil Rights Act of 1964 that “prohibits exclusion from participation in, denial of benefits of, and discrimination under federally assisted programs on grounds of race, color, or national origin.”

The MPOs and RPOs are responsible for preparing the Public Participation Plan, but may receive assistance from PennDOT on technical topics and issues. The public participation plan is a key element to assure that all transportation related activities in the region are communicated and involve all members of the public including traditionally underserved and protected populations.

xi. Coordinated Public Transit-Human Services Plan

Federal transit law (Enhanced Mobility of Seniors and Individuals with Disabilities – 49 USC 5310) provides funding to help improve mobility for older and disabled individuals. To receive federal funding, the MPO or RPO must prepare a Coordinated Public Transit-Human Services Transportation Plan. The plan must follow an inclusive and public process to identify, prioritize and select transit projects.

The MPOs and RPOs are responsible for preparing the Coordinated Public Transit-Human Services Transportation Plan, but may receive assistance from PennDOT on funding to complete these studies and monitoring or best practice sharing across the Commonwealth.
xii. Congestion Management Plan (23 CFR 450.322)

The FHWA defines congestion management as “the application of strategies to improve transportation system performance and reliability by reducing the adverse impacts of congestion on the movement of people and goods.” Congestion management plans are required for TMAs, which are typically served by an MPO. The MPO is required to implement a process that addresses integrated management and operation of a multimodal system through the use of travel demand reduction, job access, and operational management strategies. For additional guidance, refer to the FHWA Congestion Management Process Guidebook.

The MPOs are responsible for preparing the Congestion Management Plan, but may receive assistance from PennDOT on data analysis and guidance, as well as information on traffic signals, traffic volumes and other relevant topics related to congestion. PennDOT may also have access to Highway Occupancy Permit (HOP) development information that could assist in identifying critical corridors of concern and intersections of concern in the region.

xiii. Roadway Functional Classification Review (23 CFR 470.105(b))

The term Functional Classification describes the manner by which a road is categorized as to how it serves the traveling public. For instance, roads provide mobility for travelers and access to destinations. The requirement to classify roads began with ISTEA, which established three main classification categories: Arterials, Collectors, and Local Roadways. FHWA’s Highway Functional Classification Concepts, Criteria and Procedures provides additional information to understand functional classification and the concepts of mobility and access.

In Pennsylvania, the MPOs and RPOs are generally responsible for identifying and analyzing land use and population changes in the region that might necessitate a review of functional class as it relates to 10 year updates of census or land use information. PennDOT is generally responsible for providing technical expertise related to the roadways themselves and the roadway network.

PennDOT has prepared guidance in the manual Procedures for Revisions to Functional Classifications and Federal-Aid Systems, that outlines the complete policies and procedures that are to be followed by the State, MPOs, RPOs, and local officials.

xiv. Annual Listing of Obligated Projects (23 CFR 540.334)

The Annual Listing of Obligated Projects is a required listing of all projects and strategies listed in the TIP for which federal funds were obligated during the immediately preceding program year.

The development of the annual listing “shall be a cooperative effort of the State, transit operator, and MPO.” In Pennsylvania, the MPOs are generally responsible for preparing the list of projects in coordination with transit operators for review by PennDOT. RPOs are not required to prepare the annual listing.

SAFETEA-LU gave special emphasis to listing two project types – investments in pedestrian walkways and bicycle operators for review by PennDOT. RPOs are not required to prepare the annual listing.

The MPOs and RPOs are generally responsible for preparing the list of projects in coordination with transit operators for review by PennDOT. RPOs are not required to prepare the annual listing.

SAFETEA-LU gave special emphasis to listing two project types – investments in pedestrian walkways and bicycle operators for review by PennDOT. RPOs are not required to prepare the annual listing.

xv. Public Participation Plan for Statewide Planning (23 CFR 450.210)

The Public Participation Plan is the formal documentation of the process by which a state DOT will use to gain input from various stakeholders including elected officials, transportation agencies, special interest groups, disadvantaged populations, and the public. PennDOT is responsible for preparing this plan and shares that information with the MPOs and RPOs to assist in the development of their local plans and procedures.

The Public Participation Plan must comply with Title VI of the Civil Rights Act of 1964 that “prohibits exclusion from participation in, denial of benefits of, and discrimination under federally assisted programs on grounds of race, color, or national origin.”

xvi. Title VI Compliance and Implementation Plan

To comply with Title VI of the Civil Rights Act of 1964, state agencies must take action to avoid disproportionately or adverse impacts to minority or low-income groups. 23 CFR 450.316 (b) (2) Metropolitan transportation planning process requires that planning efforts “be consistent with Title VI of the Civil Rights Act of 1964 and the Title VI assurance executed by each State under 23 USC 324 and 29 USC 794, which ensure that no person shall, on the grounds of race, color, sex, national origin, or physical handicap, be excluded from participation in, be denied benefits of, or be otherwise subjected to discrimination under any program receiving Federal assistance from the United States Department of Transportation.”

The FHWA PA Division Offices is responsible for ensuring that PennDOT has an approved Title VI/ Nondiscrimination Plan and completes Annual Update Reports. PennDOT is responsible for preparing the Title VI Compliance and Implementation Plan. MPOs and RPOs can assist PennDOT in this process by identifying and engaging these identified populations and assuring that and adequate public engagement program is completed in the development of any transportation related activity.

The Division Offices must also ensure that PennDOT is conducting an effective Monitoring Program of the efforts of MPOs and RPOs to comply with Title VI and the additional Nondiscrimination requirements. The FHWA website addressing Civil Rights and nondiscrimination offers resources for agencies to reference when developing compliance activities. PennDOT’s Title VI Program provides guidance for complying with the Federal statute.

xvii. Title VI Plan

MPOs and RPOs are responsible for preparing a Title VI Plan for their region which complies with the same requirements that state agencies must adhere to. PennDOT will review this plan and can provide assistance with its development.

xviii. Statewide Environmental Justice Plan

Environmental Justice (EJ) refers to the implementation of Executive Order (EO) 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations. To ensure that underserved, low-income, minority or other traditionally vulnerable and overlooked segments of the population are included in transportation planning efforts, PennDOT prepared Every Voice Counts: Moving Toward Environmental Justice (2012), which describes methods and expectations for inclusion.
PennDOT is responsible for preparing the Statewide Environmental Justice Plan. MPOs and RPOs can assist PennDOT in this process by identifying and engaging these identified populations and assuring that adequate public engagement program is completed in the development of any transportation related activity.

PennDOT provides guidance for project level application of Environmental Justice in Publication 746.

The Title VI Circular defined Limited English populations as “refers to persons for whom English is not their primary language and who have a limited ability to read, write, speak, or understand English. It includes people who reported to the U.S. Census that they speak English less than very well, not well, or not at all. PennDOT addressed how the agency will engage with LEP in the Every Voice Counts State Environmental Justice Plan.

PennDOT is responsible for preparing the Language Access Plan. However, MPOs and RPOs can assist PennDOT in this process by identifying and engaging these identified populations.

**xx. Limited English Proficiency Plan & Environmental Justice**

On February 11, 1994, Executive Order 12898 (Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations), directed Federal agencies to ensure that “programs or activities receiving Federal financial assistance that affect human health or the environment do not directly, or through contractual or other arrangements, use criteria, methods, or practices that discriminate on the basis of race, color, or national origin.” The term Environmental justice (EJ) refers to the activities or efforts that an organization will undertake to meet the mandate of the Civil Rights Act.

On August 11, 2000, Executive Order 13166, (Improving Access to Services for Persons with Limited English Proficiency) required Federal agencies to ensure meaningful access to services to people with limited English proficiency (LEP). FHWA provides guidance to meet LEP goals. For additional information, visit LEP.gov, which is the Limited English Proficiency (LEP) Federal Interagency Website.

MPOs and RPOs are responsible for preparing the Limited English Proficiency Plan. Publication No. 737, Environmental Justice Moving Forward and Publication No. 746, Project Level Environmental Justice Guidance offers MPOs and RPOs valuable instruction for compliance related to transportation planning and programming of projects.

**CHAPTER 3**

**PLANNING PARTNER CHARACTERISTICS**

**A. Organizational Comparison of MPOs and RPOs**

Transportation planning in Pennsylvania is a dynamic process that is by necessity collaborative in nature. PennDOT, in partnership with the MPOs and RPOs, works continuously to ensure that all state and federal requirements are fulfilled. This section provides a summary comparison of the MPO and RPO organizations who are partners with PennDOT in the transportation planning process.

<table>
<thead>
<tr>

<th>MPO</th>
</tr>
</thead>
<tbody>
<tr>
<td>Geographic area defined by US Census urbanized areas based upon population of more than 50,000 individuals</td>
<td></td>
</tr>
</tbody>
</table>

Throughout Pennsylvania, the characteristics of the MPOs and RPOs vary greatly, from the land area and population of the region, the number of transportation resources present, and the staff available to support the MPO and RPO operations. Chapter 2 Section B contains an individual profile for each of the planning partners within the state that illustrates their specific features and attributes. The following table highlights and compares some of these defining characteristics.
### Planning Partner Characteristic Comparison

**B. Planning Partner Profiles: MPOs, RPOs, and Independent County**
The Adams County Transportation Planning Organization (ACTPO) prioritizes and allocates federal, state, and local transportation funds for roads, bridges, bicycle/pedestrian safety, and public transit. ACTPO was formed in 1999 as a Rural Planning Organization (RPO) covering all of Adams County. In March of 2013, ACTPO officially became a Metropolitan Planning Organization (Adams County MPO), due to the expansion of the Hanover Urbanized Area into Adams County.

Adams County has 448 bridges. There are 381 state owned bridges and 67 locally owned bridges. Source: PennDOT Bridge Management System, 2017

**Bicycle and Pedestrian Travel**
Pennsylvania Bicycle Route S traverses Adams County using State Route 234. Pennsylvania Bicycle Routes (www.pennshare.maps.arcgis.com/)

Adams County is working to build the North Gettysburg Area Trail System, which will provide a walking and bicycling link between Gettysburg Borough and portions of Cumberland and Straban Townships. More information about bicycle and pedestrian facilities can be found at PA DCNR’s website. PA DCNR’s Explore PA Trails (www.explorefltrails.com)

**Aviation**
Adams County has four aviation facilities that provide general aviation air transport services. The largest, Gettysburg Airport and Travel Center, is a general service facility located outside of Gettysburg Borough with approximately 8,600 annual operations. Source: 2040 Long Range Transportation Plan Update, Adams County, Pennsylvania, 2017

**Transit**
Freedom Transit, a division of the York Adams Transportation Authority (YATA), provides fixed route transit options connecting the National Battlefield with downtown Gettysburg, surrounding communities, visitors’ centers and Gettysburg College. Rabbittransit, another division of YATA, provides transit options to individuals with disabilities and senior citizens. Rabbittransit also provides daily express service to Harrisburg. Committee Information
The Adams County MPO Board is the only MPO committee. It has 13 voting members and meets four times per year.

Voting Members
- Adams County Boroughs Association
- Adams County Township Association
- Adams County Commissioners
- Adams County Planning Commission
- Adams County Transit Authority
- Gettysburg-Adams County Area Chamber of Commerce
- Adams County Industrial Development Authority
- PennDOT Central Office
- PennDOT District 8

Non-Voting Members
- State & Federal Representatives
- Federal Highway Administration
- Gettysburg National Military Park
- South Central Community Action Program
- Hanover Chamber of Commerce Transportation Committee
- York County Planning Commission
- Adams County Department of Emergency Services

Please visit the Adams County website for additional information on the committee structure.

Funding Source for MPO Operations

- County: 10%
- State: 10%
- FHWA: 80%

As of October 2017

Collaboration Efforts
The Adams County Planning Commission serves as an independent entity that reviews TIPs, LRTPs, TA projects (formerly TEs) for consistency with adopted County planning policies. It provides a recommendation to the MPO Board (ACTPO) on these items.

The Adams County MPO collaborates with other planning partners on TIPs, LRTPs, CMPs, Environmental Justice, Air Quality Conformity, Travel Demand Modeling, Coordinated Transportation Plans, and specific TIP projects on corridors crossing County/MPO lines.
 Pennsylvanias Metropolitan Planning Organizations and Rural Planning Organizations

The Altoona Metropolitan Planning Organization (MPO) for Blair County was formed in 1965 to serve as a transportation policy making board for the County.

**Federal Aid Linear Miles**
The Altoona MPO has 357.7 linear miles of Federal Aid highway. 322.5 miles are State Owned and 35.3 miles are Locally Owned.

**National Highway System**
The Altoona MPO has 103.7 linear miles of NHS highway. 101.8 miles are State Owned and 1.8 miles are Locally Owned.

**Rail Freight**
Norfolk Southern Corporation is the one major rail freight carrier in the Blair County region. The area also includes two short line operators: Everett Railroad Company and the Nittany and Bald Eagle Railroad. Amtrak provides east and westbound passenger service on a daily basis.

**Bridges**
Blair County has 434 bridges. There are 321 state owned bridges and 113 locally owned bridges.

Source: PennDOT Bridge Management System, 2017

*Statistics for bridges over 20 feet

**Bicycle and Pedestrian Travel**
Blair County is promoting WalkWorks, which is a local walking program for people of all ages and abilities. Information on local walking routes can be found via the WalksWorks website.

Pennsylvania Bicycle Route G connects Tioga County and the Corning, N.Y. area in the north with Bedford County and the Cumberland, Md. area to the south.

Pennsylvania Bicycle Routes (www.pennbicycle.org)

More information about bicycle and pedestrian facilities can be found at PA DCNR’s website.

PA DCNR’s Explore PA Trails (www.explorepatrails.com)

**Aviation**
The Altoona-Blair County Airport provides commercial passenger service. A local fixed base operator services general aviation with fuel and repairs. The airport serves as the site for the Federal Aviation Administration’s Western Pennsylvania Flight Service Station.

**Transit**
Altoona Metro Transit (AMTRAN) serves most of the urbanized areas with a fleet of transit buses operating on several fixed routes. Blair Senior Services, Inc. provides transportation services to elderly residents and to individuals with disabilities in and around the Altoona metropolitan area and Blair County, in general.

**Park and Rides**
PennDOT hosts one formal Park and Ride location in Blair County located at Interstate 99 at Exit 39 (Pinecroft).

Federal Aid Linear Miles
The Cambria County MPO has 473.0 linear miles of Federal Aid highway. 447.1 miles are State Owned and 25.8 miles are Locally Owned.

National Highway System
The Cambria County MPO has 113.1 linear miles of NHS highway. 111.8 miles are State Owned and 1.4 miles are Locally Owned.

Aviation
Air transportation in Cambria County is provided by one commercial passenger airport and one general aviation facility. The John Murtha Johnstown-Cambria County Airport is the principal air transportation facility in the county. The airport hosts over 45,000 air operations a year for scheduled commercial airline service, the National Guard, US Marine, and Reserves, and corporate aircraft. The Ebensburg Airport is a non-commercial general aviation facility.

Source: Cambria County Long Range Transportation Plan, 2015-2040

Bicycles and Pedestrian Travel
Cambria County has several on-road bicycle routes that total nearly 60 miles. The Ghost Town Trail is one of several off-road hiking trails located within the region. More information can be found visiting the Cambria County Conservation & Recreation Authority’s website.

More information about bicycle and pedestrian facilities can be found at PA DCNR’s website. PA DCNR’s Explore PA Trails (www.explorepatrails.com)

No Pennsylvania Bicycle Routes are present within the County.

Federal Aid Linear Miles

The Centre County MPO has 468.2 linear miles of Federal Aid highway. 429.2 miles are State Owned, 39.0 miles are Locally Owned. Source: Pennsylvania Highway Statistics, 2015

National Highway System

The Centre County MPO has 161.6 linear miles of NHS highway. 161.3 miles are State Owned, 0.3 miles are Locally Owned. Source: Pennsylvania Highway Statistics, 2015

Rail Freight

The SEDA-COG Joint Rail Authority owns active rail lines in Centre County; operations are provided by the Nittany and Bald Eagle Railroad and focus on freight movements. Norfolk Southern Corporation possesses track rights over the Nittany and Bald Eagle Railroad from Lock Haven to Tyrone. The Bellefonte Historical Railroad, a tourist railroad, operates over the Nittany and Bald Eagle Railroad. The R. J. Corman Railroad Group, LLC/Pennsylvania Lines operates along the boundary between Centre County and Clearfield County. Source: Centre County Long Range Transportation Plan 2044, September 2015

Bridges

Centre County has 492 bridges. There are 434 state owned and 58 locally owned bridges. Source: PennDOT Bridge Management System, 2017

Bicycle and Pedestrian Travel

Two Pennsylvania Bicycle Routes traverse Centre County, Routes G and V. Pennsylvania Bicycle Routes (www.pennshare.maps.arcgis.com)

Designated bike trails, proposed trails and multimodal transfer points can be found by visiting the Centre Region Bicycling Routes map.

More information about bicycle and pedestrian facilities can be found at PA DCNR’s website. PA DCNR’s Explore PA Trails (www.explorepatrails.com)

Aviation

One commercial scheduled service airport, four general airports and one glider port serve Centre County. University Park Airport is a commercial scheduled service airport and is one of the top five of freight cargo airports within the state. The Mid-State Regional Airport, a general airport, also serves as a forest fire attack base for the DCNR. The three other general airports are Bellefonte, Penns Cave, and Centre Airpark. The glider port is the Ridge Soaring Gliderport.

Source: Centre County Long Range Transportation Plan 2044, September 2015

Transit

The Centre Area Transportation Authority (CATA) provides transit service to the six Centre Region municipalities, Bellefonte Borough, and Spring and Benner Townships. For complete route and schedule information, as well as real-time bus tracking, visit: www.catabus.com.

The Delaware Valley Regional Planning Commission (DVRPC) was formed by an Interstate Compact through legislation passed by the Pennsylvania Legislature in 1965 and by the New Jersey Legislature in a series of conforming acts passed between 1966 and 1974. DVRPC is the MPO for a nine-county region that includes Bucks, Chester, Delaware, Montgomery, and Philadelphia counties in Pennsylvania and Burlington, Mercer, Camden, and Gloucester counties in New Jersey.

### Federal Aid Linear Miles

The DVRPC MPO has 3,984.0 linear miles of Federal Aid highway.

3052.5 miles are State Owned

931.5 miles are Locally Owned

### National Highway System

The DVRPC MPO has 1,379.7 linear miles of NHS highway.

1,189.9 miles are State Owned

97.1 miles are Locally Owned

93.6 miles are Owned By Others (PA Turnpike, Toll Bridge)

### Transit

The Southeastern Pennsylvania Transportation Authority (SEPTA) is the primary provider of mass transit in the Pennsylvania portion of the DVRPC MPO region. SEPTA operates regional rail, subway/elevated rail, trolley, trackless trolley, and bus service and also offers service to the elderly and individuals with disabilities through a customized paratransit unit.

The region is also served by a number of other transit carriers including New Jersey Transit, Delaware River Port Authority (DRPA), Port Authority Transit Corporation (PATCO), Amtrak and Pottstown Area Rapid Transit (PART). Daily state-supported intercity bus service is provided to the region by Greyhound Lines, SEPTA, and Martz Tourways.

The region is also served by a number of other transit carriers including New Jersey Transit, Delaware River Port Authority (DRPA), Port Authority Transit Corporation (PATCO), Amtrak and Pottstown Area Rapid Transit (PART). Daily state-supported intercity bus service is provided to the region by Greyhound Lines, SEPTA, and Martz Tourways.

At present, there are 31 active port facilities on the Delaware and Schuylkill rivers in Southeastern Pennsylvania; some are privately owned while others are publicly owned.

### Parks and Rides

PennDOT hosts Park and Ride locations in Bucks County, Chester County, Montgomery County, and Philadelphia County. DVRPC Office of Marketing and Commuter Services hosts several commuter services.

Information can be found [here](#).

**NOTE:** All characteristics information only represents the PA portion of the DVRPC region.
Committee Information
The Regional Technical Committee is comprised of 30 voting members who meet monthly and make recommendations on action items for the DVRPC Board. The Board is an 18 member body having the authority and responsibility to make decisions affecting the entire organization as well as the nine-county region.

Other Advisory Committees include:
- Public Participation Task Force
- Delaware Valley Goods Movement Task Force
- Regional Safety Task Force
- Transportation Operations Task Force
- Central Jersey Transportation Forum
- Healthy Communities Task Force
- Information Resources Exchange Group
- Regional Community and Economic Development Forum
- Regional Aviation Committee
- Urban Waterfront Action Group

Please visit the DVRPC MPO website for additional information on the committee structure.

COLLABORATION EFFORTS
The DVRPC Goods Movement Task Force includes participation of other MPOs, both from PA and NJ, and meeting agenda items are typically of mega-region scale.

DVRPC frequently coordinates with New Jersey MPOs on Safety Program related to HSIP funding.

DVRPC also periodically coordinates with WILMAPCO in the Wilmington, DE area on issues with cross-border impacts such as transit planning.

More information about bicycle and pedestrian facilities can be found at PA DCNR’s website. [PA DCNR’s Explore PA Trails](www.explorepa-trails.com)

**Aviation**

The Erie International Airport, Tom Ridge Field, is served by United, Delta, and American Airlines. These major airlines connect a significantly growing number of travelers in the Erie metropolitan area with over 1,100 national and international cities. Erie International also recently established a Federal Trade Zone allowing for commercial cargo shipments. Two general aviation airports also serve the county. [Source: Erie County 2042 Long Range Transportation Plan, March 2017]

**Rail Freight**

Two major freight rail lines serve the Erie area, Norfolk Southern Corporation and CSX Transportation Inc. The Bessemer and Lake Erie Railroad and the Buffalo and Pittsburgh Railroad, Inc. are the two regional railroads. The local East Erie Commercial Railroad services the GE locomotive plant facilities. **Federal Aid Linear Miles**

The Franklin County MPO has 376.8 linear miles of Federal Aid highway, 347.8 miles are State Owned, 29.0 miles are Locally Owned.

**National Highway System**

The Franklin County MPO has 81.7 linear miles of NHS highway, 72.8 miles are State Owned, 14.8 miles are Owned By Others.

**Bridges**

Franklin County has 419 bridges. There are 324 state owned and 95 locally owned bridges.

**Aviation**

The Franklin County Regional Airport (FCRA) is a public use airport that is used by general aviation aircraft and does not offer scheduled passenger service.

Source: Franklin County, PA Forward Long-Range Transportation Plan 2013-2032, 2013

**Rail Freight**

Two major freight railroad lines (Norfolk Southern Corporation and CSX Transportation, Inc.) serve Franklin County. Norfolk Southern’s mainline connects Hagerstown, Md, with the major yards in the Harrisburg area. In addition to providing freight service to local industries and shippers, Norfolk Southern has constructed an intermodal facility adjacent to the I-81/US 11 Interchange (Exit 3) just south of Greencastle. CSX Transportation, Inc. has trackage rights on Norfolk Southern’s rail line. CSX Transportation Inc. serves local shippers and industries and has completed the construction of an intermodal center near the interchange of I-81 and PA 316 at Exit 14.

Two Pennsylvania Bicycle Routes traverse the region, Route I and Y. Pennsylvania Bicycle Routes (www.bikepa.com)
The Lackawanna River Heritage Trail, which is a part of a 70-mile trail that follows the Lackawanna River and connects with the Delaware & Hudson Rail Trail, is present in the region. More information about bicycle and pedestrian facilities can be found at PA DCNR’s website, PA DCNR’s Explore PA Trails (www.explorepatrials.com)

Rail Freight
One Class I and several other regional and short line railroads currently operate within Lackawanna and Luzerne counties including Norfolk Southern Corporation, Reading, Blue Mountain and Northern Railroad, Delaware-Lackawanna Railroad Company, Luzerne and Susquehanna Railroad Company, North Shore Railroad Company, Pennsylvania Northeast Regional Railroad Authority (PNRRA), and Luzerne County Rail Corporation. Source: Lackawanna-Luzerne Long Range Transportation Plan Update, Sept. 2015

Aviation
Commercial and freight air service is provided by the Wilkes-Barre/Scranton International Airport located in Avoca, Luzerne County. Jointly owned and operated by Lackawanna and Luzerne counties, and situated in close proximity to a Keystone Opportunity Zone, the airport complex consists of over 800 acres. Two general aviation facilities operate in the region, the Wilkes-Barre Wyoming Valley Airport and Hazleton Airport. Seaman’s Field is a privately-owned airport located in Lackawanna County. Source: Lackawanna-Luzerne Long Range Transportation Plan Update, Sept. 2015

Transit
Major transit providers in the region include, the County of Lackawanna Transit System (COLTS), Luzerne County Transit Authority (LCTA), and Hazleton Public Transit (HPT). There are three intermodal transportation centers within the region, in Hazleton, Scranton, and Wilkes-Barre, that serve as a hub for transit and commercial buses and taxis and include parking garages. Source: Lackawanna-Luzerne Long Range Transportation Plan Update, Sept. 2015

Park and Ride
PennDOT operates numerous Park and Ride facilities in Lackawanna and Luzerne counties. Facilities are located along US Route 6, Interstate 84, Interstate 81, Interstate 80, and Interstate I-380. Source: Lackawanna-Luzerne Long Range Transportation Plan Update, Sept. 2015

Bridges
The Lackawanna/Luzerne MPO has 1,139 bridges. There are 983 state owned bridges and 156 locally owned bridges. Source: PennDOT Bridge Management System, 2017

Committee Information

The Technical Committee consists of people who represent all modes of transportation. The Technical Committee prepares all plans and documents and presents them to the Coordinating Committee, which reviews the material and takes the appropriate action.

The Transportation Advisory Committee acts as an advisory body to the Technical Committee and meets about four times per year.

Voting Members
- PennDOT Central Office
- PennDOT District 4
- Lackawanna County Commissioners
- Lackawanna County Community and Economic Development
- Luzerne County Commissioners
- Hazleton City
- City of Scranton
- City of Wilkes-Barre
- County of Lackawanna Transit System
- Luzerne County Transit Authority
- Wilkes-Barre/Scranton International Airport

Non-Voting Members
- Federal Highway Administration
- Federal Transit Administration
- Federal Aviation Administration
- Senator John Blake’s Office
- Pennsylvania Northeast Regional Railroad Authority

Please visit the Lackawanna/Luzerne MPO website for additional information on the committee structure.
The Lancaster County Transportation Coordinating Committee is the Metropolitan Planning Organization (Lancaster County MPO) for all of Lancaster County. The MPO was created in 1965 through an agreement between PennDOT, the City of Lancaster and Lancaster County.

Committee Information
The Lancaster County Transportation Coordinating Committee is composed of 22 voting members and meets five times per year. The Transportation Technical Advisory Committee is composed of 19 voting members that meet monthly and represent a wide range of transportation interests and advises the MPO on all transportation matters. The Bicycle and Pedestrian Advisory Committee reports to the Transportation Technical Advisory Committee on bicycle and pedestrians issues and works to implement the Bicycle and Pedestrian Transportation Plan. In addition, special task forces may be established to work on specific issues.

Voting Members
- County Commissioner
- Lancaster County Planning Commission
- City of Lancaster
- South Central Transit Authority
- Lancaster Airport Authority
- Lancaster County Transportation Authority
- PennDOT District 8
- PennDOT Central Office
- Business and Finance Community
- Chamber of Commerce
- Operating Railroad
- Bike/Ped. Advisory Committee
- Environmental Community

Non-Voting Members
- Motorized Vehicle Interests
- Inter-Municipal Committee
- Outer Municipalities
- Advocate for Persons with Disabilities
- Legislative Delegation

Please visit the Lancaster MPO website for additional information on the committee structure.

Primary Contact Person: James R. Cowhey, Executive Director
e-mail: cowhey@co.lancaster.pa.us  phone: 717.299.8333

Funding Source for MPO Operations

Lancaster County MPO has Memorandums of Understanding with all of the adjacent MPOs regarding cooperation and transportation planning responsibilities for shared urbanized areas. These partnerships allow the MPOs to coordinate reviews and comments on Federal rulemakings, cooperate on freight planning efforts, and serve on advisory committees at partner MPO requests, such as the DVRPC Congestion Management Process Advisory Committee.

The Lancaster County MPO collaborates with the SCTA to perform some of the required core functions of the MPO.

**Federal Aid Linear Miles**

The Lebanon County MPO has 284.3 linear miles of Federal Aid highway. 240.7 miles are State Owned, 43.7 miles are Locally Owned.

**National Highway System**

The Lebanon County MPO has 88.3 linear miles of NHS highway. 74.1 miles are State Owned, 8.3 miles are Locally Owned, 5.9 miles are Owned By Others (PA Turnpike).

**Aviation**

Four general aviation airports: Reigle (South Londonderry Twp.), Keller Bros. (Heidelberg Twp.), Farmers Pride (Bethel Twp.) and Deck (Jackson Twp.), one military airport (Muir Field, Ft. Indiantown Gap) and Central PA Heliport (South Londonderry Twp.) are located throughout Lebanon County. Residents of Lebanon County travel outside the county either to the Harrisburg International Airport or Lancaster Regional Airport for scheduled commercial airline service.

Source: Draft Lebanon County 2017-2040 Long Range Transportation Plan, April 2016

**Rail Freight**

Norfolk Southern Corporation’s mainline passes through the heart of Lebanon County bisecting the County, connecting Harrisburg to the west and Reading and Philadelphia to the east. Along this mainline, Norfolk Southern provides freight services to small industries, and also has a small yard in the City of Lebanon.

Source: Draft Lebanon County 2017-2040 Long Range Transportation Plan, April 2016

**Bicycle and Pedestrian Travel**

There are several recreational biking and hiking trails that traverse the County. More information about bicycle and pedestrian facilities can be found at PA DCNR’s website.

PA DCNR’s Explore PA Trails (www.explorepatrails.com)

No Pennsylvania Bicycle Routes are present within the County.

**Transit**

Lebanon Transit (LT) is the area’s primary provider of public transit. LT provides public transit service along major highway routes within the City of Lebanon and surrounding municipalities. LT also provides fixed route transit service as well as paratransit service to the senior citizens and individuals with disabilities in the Lebanon County area, with additional service into Hershey and to the Hershey Medical Center.

Source: Draft Lebanon County 2017-2040 Long Range Transportation Plan, April 2016

**Park and Ride**

The LT Park and Ride is located at PA 934 and I-81 near Fort Indiantown Gap and provides daily express bus service into Harrisburg.

**Pennsylvania’s Metropolitan Planning Organizations**

The Lebanon County Planning Department serves as staff support for the Metropolitan Planning Organization (Lebanon County MPO) for all 28 municipalities that comprise Lebanon County.
LEBANON COUNTY MPO

Primary Contact Person: Julie L. Cheyney, Executive Director  
email: jcheyney@lebcnty.org  phone: 717.228.4444

Committee Information
The Lebanon County MPO has two committees, the Policy Board, with 10 voting members, and the Technical Planning Committee, with 11 voting members. Over time, the county may choose to establish other committees to enhance its operations. Examples of other committees may include a citizens committee, a goods movement committee, and a congestion management system committee.

Voting Members
- County Commissioners
- City Government
- Borough Government
- Township Government
- Greater Palmyra Area Representative
- Transit
- Lebanon Valley Chamber of Commerce
- County Government
- Lebanon County Planning Department
- Lebanon Economic Development Corp.
- PennDOT District 8
- PennDOT Central Office
- Aviation

Non-Voting Members
- Federal Highway Administration
- United States Environmental Protection Agency
- Federal Transit Administration
- Lebanon City
- Agricultural Community
- Bike Lebanon
- Lebanon Valley Expo Center/Tourism
- Community of Lebanon Assoc.
- Lebanon Valley Rails to Trails
- Lebanon County Community Action Partnership
- City of Lebanon Water Authority
- Lebanon County Emergency Management Agency

Please visit the Lebanon MPO website for additional information on the committee structure.

Funding Source for MPO Operations

As of October 2017

- County: 10%
- State: 80%
- FHWA: 10%

The Lebanon County MPO collaborates with other planning partners on a regular basis. The Commuter Services of PA program is a good example of close collaboration and support across a wide area and common interests.

The Lebanon County MPO collaborates with LT, the Lebanon Valley Chamber of Commerce, the PA Department of Conservation and Natural Resources, the PA Department of Environmental Protection, and the PA Department of Community and Economic Development to perform some of the required core functions of the MPO.
Established in 1964, the Lehigh Valley Transportation Study is the Metropolitan Planning Organization (Lehigh Valley MPO) for all of Lehigh and Northampton counties.

**Bridges**
The Lehigh Valley MPO has 919 bridges. There are 660 state owned bridges and 259 locally owned bridges.

**Roadway**

<table>
<thead>
<tr>
<th>Classification</th>
<th>Total Linear Miles</th>
<th>Daily Vehicle Miles Traveled (DVMT)</th>

<td>4,125.2</td>
<td>13,896,888</td>
</tr>
</tbody>
</table>

**Federal Aid Linear Miles**
The Lehigh Valley MPO has 912.9 linear miles of Federal Aid highway.

714.6 miles are State Owned
198.3 miles are Locally Owned

**National Highway System**
The Lehigh Valley MPO has 286.3 linear miles of NHS highway.
245.4 miles are State Owned
24.2 miles are Locally Owned
28.7 miles are Owned By Others (PA Turnpike, Toll Bridge)

**Rail Freight**
Rail service is limited to the movement of freight. Norfolk Southern Corporation is the primary Class I railroad operator in the Lehigh Valley. The conversion of a portion of the former Bethlehem Steel plant in Bethlehem, Northampton County to an intermodal terminal is anticipated to be a growth factor of rail freight service in the region.

Source: Lehigh Valley Long Range Transportation Plan, October 2015

**Aviation**
The Lehigh Northampton Airport Authority (LNAA) owns and operates three public use airports in the Lehigh Valley. Lehigh Valley International Airport (LVIA) provides facilities to support scheduled passenger, scheduled cargo, charter and corporate aviation. Queen City Airport in the City of Allentown, Lehigh County serves as a basic category general aviation reliever airport to LVIA for the west-central portion of the Lehigh Valley. Braden Airpark in Forks Township, Northampton County serves as a basic category general aviation reliever airport for the east-central portion of the Lehigh Valley.

Source: Lehigh Valley Long Range Transportation Plan, October 2015

**Bicycle and Pedestrian Travel**
Pennsylvania Bicycle Route L traverses Lehigh County.

Source: Pennsylvania Bicycle Routes (www.pennshare.maps.arcgis.com)

There are also several recreational biking and hiking trails throughout Lehigh and Northampton counties. More information about bicycle and pedestrian facilities can be found on PA DCNR’s website.

**Transit**
The Lehigh and Northampton Transportation Authority (LANta) operates the public transportation system in the Lehigh Valley MPO. LANta operates the LANtaBus system, a network of 28 fixed bus routes and 12 special routes, and is concentrated in urbanized areas of the cities of Allentown, Bethlehem, and Easton and surrounding boroughs and townships. LANta also administers the LANtaVan program, a fully coordinated human service transportation network which arranges specialized door-to-door transportation services for individuals with disabilities and the elderly. LANta contracts with Easton Coach Company, Inc. to administer and operate these services.

Source: Lehigh Valley Long Range Transportation Plan, October 2015
Committee Information
The Lehigh Valley MPO is comprised of two committees, the Technical Committee and the Coordinating Committee. The Technical Committee is an advisory body to the Coordinating Committee, reviewing plans, programs, and various other items brought before them for review and recommendation to the Coordinating Committee. The Coordinating Committee is the policy body which formally adopts items reviewed by the Technical Committee. A Freight Advisory Committee also meets four times per year.

Voting Members

Committee Information
The North Central RPO has established the Rural Transportation Planning Committee to act as the authority on all regional transportation planning activities, to establish policy, and to prioritize all major capital projects throughout the region in accordance with the guiding principles for planning and programming. This Committee has 20 voting members and consists of the county planners from the six-county region, representatives from PennDOT, public transit, aviation and rail, as well as local community groups with an interest in transportation and economic development throughout the region. The North Central RPO also has advisory committees, such as the Public Participation Committee, Transportation Alternative Program (TAP) Review Committee and the Economic Development Administration (EDA)/Comprehensive Economic Development Strategy Committee (CEDs). The North Central Pennsylvania Regional Planning and Development Commission's Executive Board serves as the RPO's Executive Committee.

Voting Members
Cameron County Industrial Development Authority

Please visit the North Central RPO website for additional information on the committee structure.

COLLABORATION EFFORTS
The North Central RPO was established as an Economic Development District (EDD) by the U.S. Department of Commerce, Economic Development Administration (EDA) and as a Local Development District (LDD) by the U.S. Appalachian Regional Commission (ARC) and the Pennsylvania Department of Community and Economic Development (DCED), serving both the private and public sectors in a six county region, including Cameron, Clearfield, Elk, Jefferson, McKean and Potter counties.

The North Central RPO routinely coordinates with Centre County MPO, SEDA-COG MPO, Williamsport MPO and Southern Alleghenies RPO based on overlapping topical issues. The North Central RPO also actively coordinates with RPO America, a National RPO consortium. RPO America was established in June 2016 by the National Association of Development Organizations (NADO) Board of Directors to serve as the national professional association for regional and rural transportation planning professionals, practitioners and other interested stakeholders.

NORTHEASTERN PENNSYLVANIA ALLIANCE MPO

COMMITTEES

Primary Contact Person: Jeffrey K. Box, President/CEO
email: jbox@nepa-alliance.org  phone: 570.655.5581

Committee Information
The NEPA MPO has a Technical Planning Committee, which consists of two county representatives from each of the four MPO counties who are appointed by the county boards of commissioners, one representative from the East Stroudsburg Urbanized Area, three transit representatives, one representative from PennDOT District 4, 5 and Central Office and a representative from the NEPA Alliance Board of Directors. The NEPA MPO also has a Policy Board, which consists of one NEPA Board of Directors member from each of the four MPO counties and a representative from PennDOT Central Office. The NEPA President and representatives from PennDOT District 4 and 5 serve as ex-officio members with voice privileges. The NEPA MPO also has an advisory committee, the MPO Transit Committee.

Voting Members
Northampton Community College, Monroe Campus
Pike County
St. Luke’s Miners Memorial Hospital
Pocono Counties WIA
PennDOT Central Office
PennDOT District 4
PennDOT District 5

Federal Highway Administration

Please visit the NEPA MPO website for additional information on the committee structure.

COLLABORATION EFFORTS
NEPA Alliance serves both the private and public sectors in a seven county region, including Carbon, Lackawanna, Luzerne, Monroe, Pike, Schuylkill, and Wayne County. The NEPA Alliance was established as an Economic Development District (EDD) by the US Department of Commerce, Economic Development Administration (EDA) and as a Local Development District (LDD) by the U.S. Appalachian Regional Commission (ARC) and the Pennsylvania Department of Community and Economic Development (DCED).

The NEPA MPO serves four counties for transportation planning and programming, and also provides LTAP services to the Lackawanna/Luzerne MPO and Wayne County and conducts Asset Inventory services for Wayne County. Additional collaboration includes convening the Focus 81 Committee for the Lackawanna/Luzerne MPO and initiating Functional Classification Reviews with the Lackawanna/Luzerne MPO and Wayne County.

The NEPA MPO collaborates with the NEPA Alliance LDD to perform some of the required core functions of the MPO.

Funding Source for MPO Operations

As of October 2017

- 80% State
- 10% Federal Highway Administration
- 10% Other - NEPA Alliance Funds

Committee Information
The SEDA-COG MPO has a Technical Committee that is the review and recommendation committee and consists of 17 members that meet as needed. There is also a Coordinating Committee that is the decision-making committee where the recommendations of the Technical Committee are acted upon. The Coordinating Committee has 17 members that meet six times per year. Additional committees include a Transportation Alternatives Project Review Committee, a Local Bridge Subcommittee, an Aviation Subcommittee, and a Local Access Road Subcommittee.

Voting Members: Clinton County, Columbia County, Juniata County, Mifflin County, Montour County, Northumberland County, Snyder County, Union County, Transit Interests, Multi-Modal Interests, Town of Bloomsburg, Borough of Berwick, SEDA-COG Board of Directors, SEDA-COG Transportation Program, PennDOT District 2, PennDOT District 3, PennDOT Central Office

Non-Voting Members: Federal Highway Administration, Centre County MPO, Williamsport Area Transportation Study MPO, Harrisburg Area Transportation Study MPO, Lackawanna/Luzerne Transportation Study MPO

Please visit the SEDA-COG website for additional information on the committee structure.

COLLABORATION EFFORTS
The SEDA-COG MPO collaborates with the Williamsport MPO on a Joint Coordinated Transit Plan, functional classification reviews, transit coalition support, and LTAP marketing. The SEDA-COG MPO also partners with the Centre County MPO to support LTAP tasks for Centre County and functional classification of area roadways.

The SEDA-COG MPO collaborates with the Lackawanna/Luzerne MPO on Urbanized Area smoothing, GIS support, functional classification reviews, and freight planning.

The SEDA-COG MPO collaborates with the SEDA-COG JRA and the transit operators to perform some of the required core functions of the MPO.

Federal Aid Linear Miles

The SPC MPO has 5,965.8 linear miles of Federal Aid highway.

5,061.2 miles are State Owned
904.7 miles are Locally Owned

National Highway System

The SPC MPO has 1571.1 linear miles of NHS highway.

1324.0 miles are State Owned
62.4 miles are Locally Owned
184.8 miles are Owned By Others (PA Turnpike)

Bridges

The SPC MPO has 6,689 bridges. There are 5,298 state owned bridges and 1,391 locally owned bridges.

Source: PennDOT Bridge Management System, 2017

Aviation

The SPC MPO region has access to numerous airports including two commercial airports: Pittsburgh International Airport in Allegheny County and the Arnold Palmer Regional Airport in Westmoreland County. Other general aviation airports are located within each of the ten counties of the SPC region.

Source: Mapping the Future: The Southwestern PA Plan, 2015

Rail Freight

The SPC MPO region is served by twenty railroads including three Class I railroads: CSX Transportation Inc., Norfolk Southern Corporation and Canadian National Railway.

Source: Mapping the Future: The Southwestern PA Plan, 2015

Bicycle and Pedestrian Travel

Three Pennsylvania Bicycle Routes are located within the region, Routes A, S and V.

Pennsylvania Bicycle Routes

Committee Information
The SPC MPO has an Executive Committee, a Transportation Technical Committee and a Transit Operators Committee that govern the MPO operations. In addition, the SPC MPO has several advisory committees including the Active Transportation Forum, Freight Forum, Operations & Safety Forum, Policy Committee, CMAQ Committee, and Planning Directors Forum. The Transportation Technical Committee (TTC) deals exclusively with technical issues relating to transportation, and makes recommendations to SPC and the Policy Committee on a range of transportation plans and issues. The TTC meets each month in advance of SPC meetings, and, as needed, creates sub-committees tasked with specific assignments.

Voting Members
Commissioners of the 10 SPC member counties
Mayor of the City of Pittsburgh
Port Authority of Allegheny County
PennDOT Central Office and District 10, 11, & 12
PA Department of Conservation and Natural Resources
Planning directors of the 10 SPC member counties
City of Pittsburgh
PA Department of Environmental Protection
Beaver County Transit Authority (BCTA)
Butler Transit Authority
Freedom Transit
Fayette Area Coordinated Transportation (FACT)
Indiana County Transit Authority (IndiGO)
Mid Mon Valley Transit Authority
New Castle Area Transportation Authority

Non-Voting Members
Port Authority of Allegheny County
Town & Country Transit
Westmoreland County Transit Authority
Airport Corridor Transportation Association
Oakland Transportation Management Association
Pittsburgh Downtown Partnership
Federal Highway Administration
Federal Transit Administration
U.S. Environmental Protection Agency
Federal Aviation Administration
U.S. Economic Development Administration

Please visit the SPC MPO website for additional information on the committee structure.

COLLABORATION EFFORTS

TRANSPORTATION CHARACTERISTICS

Wayne County is not affiliated as a Rural or Metropolitan Planning Organization but rather it is considered an independent county. PennDOT Central Office and District 4 assume responsibility for transportation planning efforts in Wayne County.

Federal Aid Linear Miles
Wayne County has 247.5 linear miles of Federal Aid highway. 245.7 miles are State Owned and 1.8 miles are Locally Owned. Source: Pennsylvania Highway Statistics, 2015

National Highway System
Wayne County has 6.6 linear miles of NHS highway. 6.6 miles are State Owned. Source: Pennsylvania Highway Statistics, 2015

Rail Freight
Rail service is limited within the county. The Delaware and Hudson line serves the Brownsville and Forest City area. The Starrucca Viaduct has been replaced by a trail system. The former Erie-Lackawanna line runs through Gouldsboro, Lehighton Township and is used mostly for passenger tourist rail run by Steamtown in Scranton. Freight service is also made available to Mount Pocono over this line. Source: WayneCountyPA.gov, 2017

Bridges
Wayne County has 378 bridges. There are 315 state owned bridges and 63 locally owned bridges. Source: PennDOT Bridge Management System, 2017. *Statistics for bridges over 20 feet

Bicycle and Pedestrian Travel
Pennsylvania Bicycle Route Y is located within Wayne County. To view a detailed segment map click here. Pennsylvania Bicycle Routes (www.pennbicycle.maps.arcgis.com) There are several walking and bicycle facilities in the county. More information about bicycle and pedestrian facilities can be found at PA DCNR’s website. PA DCNR’s Explore PA Trails (www.explorepatrials.com)

Aviation
There are two privately owned general service airports in Wayne County: Cherry Ridge Airport and Spring Hill Airpark. Source: WayneCountyPA.gov, 2017

Transit
The Wayne County Transportation System’s defined service area includes all of Wayne County, Tafton, Carbondale area, Clarks Summit area, Scranton area, and Wilkes-Barre area. Source: WayneCountyPA.gov, 2017

Federal Aid Linear Miles

The Williamsport MPO has 490.4 linear miles of Federal Aid highway. 438.4 miles are State Owned and 52.0 miles are Locally Owned. Source: Pennsylvania Highway Statistics, 2015

National Highway System

The Williamsport MPO has 83.0 linear miles of NHS highway. 80.2 miles are State Owned and 2.8 miles are Locally Owned. Source: Pennsylvania Highway Statistics, 2015

Rail Freight

Lycoming County has two freight service railroads: Norfolk Southern Corporation and the Lycoming Valley Railroad. The Lycoming Valley Railroad is owned by the SEDA-COG Joint Rail Authority. Source: Williamsport Area Transportation Study MPO 2013-2033 Long Range Transportation Plan, 2013

Bicycle and Pedestrian Travel

Two Pennsylvania Bicycle Routes G and J, are located within Lycoming County. Pennsylvania Bicycle Routes (www.pennsharedcog.org) Lycoming County boasts several hiking and biking trails including the Pine Creek Rail Trail, which traverses Lycoming and Tioga counties. More information about bicycle and pedestrian facilities can be found at PA DCNR’s website www.explorepatrails.com and the Lycoming County Community Development website.

Transit

River Valley Transit (RVT) serves most of the urbanized area in Lycoming County with fixed-route services. The Lycoming-Clinton Counties Commission for Community Action, Inc., in coordination with STEP Inc., provides services to elderly residents and to individuals with disabilities. Source: Williamsport Area Transportation Study MPO 2013-2033 Long Range Transportation Plan, 2013

Park and Rides

PennDOT hosts several Park and Ride locations within Lycoming County as follows:
- Route 220, Reach Road Interchange, South Reach Road
- I-180 Faxon Exit (25) / Commerce Park Drive
- I-180 Route 87 Exit (21) / Loyalsock Avenue
- I-180 Hall’s Exit (13) / Lycoming Mall Drive
- I-180 Hughesville Exit (13B) along Route 405
- Route 15 at Hepburnville Exit, 3 miles north of Williamsport

Committee Information
The Williamsport MPO Coordinating Committee is the policy making body of the MPO which is represented by all transportation modes and a cross-section of state, county, and municipal government. The Coordinating Committee consists of 11 voting members that meet four times per year. The Williamsport MPO Technical Committee consists of 7 voting members that meet four times per year and advise and recommend actions for consideration by the Coordinating Committee. The Transit Advisory Committee is a sub-committee of the MPO that specializes in transit planning and programming activities and is represented by fixed route and shared ride transit providers and consumers.

Federal Aid Linear Miles

The York Area MPO has 763.8 linear miles of Federal Aid highway. 674.5 miles are State Owned 87.3 miles are Locally Owned

National Highway System

The York Area MPO has 138.7 linear miles of NHS highway. 123.4 miles are State Owned 8.8 miles are Locally Owned 6.4 miles are Owned By Others (PA Turnpike)

Bicycle and Pedestrian Travel

There are two Pennsylvania Bicycle Routes in York County, Route J and S.

Pennsylvania Bicycle Routes (www.pennbikeroads.com)

The York Area MPO region is home to several walking and bicycle facilities including the York County Rail Trail. More information about bicycle and pedestrian facilities can be found at PA DCNR’s website.

PA DCNR’s Explore PA Trails (www.explorepa.trails.com)

Transit

The Central Pennsylvania Transportation Authority (CPTA) is the primary provider of public transportation services in York County. CPTA, operating under the name of rabbittransit, provides fixed route service within York County and paratransit service within and adjacent to York County. Rabbittransit operates weekday express bus service from York to Harrisburg, Capital Area Transit, the public transit authority for the Harrisburg area, also provides public transportation to the New Cumberland Army Depot in Fairview Township.

Source: YAMPO Long Range Transportation Plan, 2017

Rail Freight

There are several rail freight providers serving York County. The York Railway Company provides local rail freight service between the City of York and Hanover and operates two inter-modal facilities within the county.

Norfolk Southern Corporation has a freight line which connects Harrisburg with Baltimore, Md. and also operates an intermodal transfer station and classification yard in York City called the Windsor Yard. CSX Transportation, Inc. provides freight service in the Hanover area on its rail line from Baltimore to Hagerstown, Md. The East Penn Railroad also operates within York County.

Source: YAMPO Long Range Transportation Plan, 2017

Aviation

There are 5 general aviation airports that are located in the York Area MPO. They include the York Airport near Thomasville, the Capital City Airport in Fairview Township, Baublitz Airport at Brogue, the Bermudian Valley Airpark at Kralltown, and the Kampel Airport near Wellsville.

Source: YAMPO Long Range Transportation Plan, 2017

Bridges

The York Area MPO has 863 bridges. There are 655 state owned bridges and 208 locally owned bridges.

COLLABORATION EFFORTS

The York Area MPO is comprised of four separate Census designated Urbanized Areas. York Area MPO has an agreement with the Lancaster, Harrisburg and Adams County MPOs to complete planning tasks for their Urbanized Areas overlapping the boundary with York County.

The Board of the Central Pennsylvania Transportation Authority is recognized by the York Area Metropolitan Planning Organization as the Transit Committee of York Area MPO.

The York Area MPO planning staff is coordinating all six MPOs in PennDOT District 8-0 to develop one process for evaluating benefits and burdens caused by transportation investment on environmental justice populations.

The York Area MPO is comprised of York County Planning Commission staff.

Funding Source for MPO Operations

As of October 2017

- State: 52.5%
- County: 24.5%
- Local Fees: 15%
- Other - FTA: 8%

C. Noteworthy Practices and Recommendations

The following highlights a few of the noteworthy practices implemented by various MPOs and RPOs throughout the state. This list was developed during the completion of this guidebook and is not intended to be comprehensive in nature. Instead, the noteworthy practices are anticipated to be continuously revised as new practices are applied.

- Increased use of online resources and social media tools to provide information to the public, to help educate the public, and to solicit public input in order to seek information and ideas for more meaningful decision-making in transportation planning.
  
  MPOs and RPOs with noteworthy practices include: Delaware Valley Regional Planning Commission MPO, North Central Pennsylvania Planning and Development Commission RPO, SEDA-Council of Governments MPO, Southwestern Pennsylvania Commission MPO, and Williamsport Area Transportation Study MPO.

- Proactive strong relationship between transit agencies and the MPO/RPO.
  
  MPOs and RPOs with noteworthy practices include: Delaware Valley Regional Planning Commission MPO, Lackawanna / Luzerne Transportation Study MPO, Lancaster County Transportation Study MPO, Lebanon County MPO, Southwestern Pennsylvania Commission MPO, and York Area MPO.

- Highly collaborative and integrated PennDOT Connects process (formerly known as the Linking Planning & NEPA process).
  
  MPOs and RPOs with noteworthy practices include: Southwestern Pennsylvania Commission MPO, York Area MPO, as well as PennDOT District 5.

- Thorough air quality conformity analysis procedures and Long Range Transportation Plan updates for non-attainment and maintenance areas that adequately address and meet the federal air quality requirements.
  
  MPOs and RPOs with noteworthy practices include: Cambria County MPO, Delaware Valley Regional Planning Commission MPO, Lancaster County Transportation Study MPO, Reading Area Transportation Study MPO, and York Area MPO.

- Outstanding freight regional planning efforts.
  
  MPOs and RPOs with noteworthy practices include: Delaware Valley Regional Planning Commission MPO, Lackawanna / Luzerne Transportation Study MPO, Lehigh Valley Transportation Study MPO, and Southwestern Pennsylvania Commission MPO.

- Proactive and continued use of performance measures and a proactive implementation of performance based planning.
  
  MPOs and RPOs with noteworthy practices include: Delaware Valley Regional Planning Commission MPO, and Reading Area Transportation Study MPO.

- Very readable and understandable LRTP, including a comprehensive process for developing the LRTP. FHWA plans to showcase these plans and processes as a model for other MPOs and RPOs.
  
  MPOs and RPOs with noteworthy practices include: Reading Area Transportation Study MPO, and York Area MPO.

- Knowledgeable, proactive, and professional MPO/RPO staff members that are up-to-date on transportation planning requirements, initiatives, programs and processes and have excellent working relationships with planning counterparts.
  
  MPOs and RPOs with noteworthy practices include: Centre County MPO, Lebanon County MPO, Shenango Valley Area Transportation Study MPO, and York Area MPO.

- Utilization of CMAQ funds to support transportation projects and programs.
  
  MPOs and RPOs with noteworthy practices include: Southwestern Pennsylvania Commission MPO, and York Area MPO.

- Clear and transparent process for project solicitation, evaluation and prioritization.
  
  MPOs and RPOs with noteworthy practices include: Centre County MPO, Shenango Valley Area Transportation Study MPO, and York Area MPO.

- Utilization of a robust and innovative public involvement process.
  
  MPOs and RPOs with noteworthy practices include: Lancaster County Transportation Study MPO, Lehigh Valley Transportation Study MPO, Reading Area Transportation Study MPO, and York Area MPO.

- Commitment to the Congestion Management Plan process.
  
  MPOs and RPOs with noteworthy practices include: Reading Area Transportation Study MPO, and York Area MPO.

Additional noteworthy practices by various MPOs and RPOs include:

- Proactive linking of land use and transportation projects, supporting smart growth concepts.

- Publishing a TIP that includes all projects, including 100% state funded projects.

- A good condensed overview of the Title VI and EJ requirements for planners and a proactive adjustment in the EJ Benefits and Burdens analysis

- Proactive LRTP update schedule, with planning and coordination for the LRTP update beginning two years prior to the anticipated adoption of the new plan

- Regional outreach and regional planning activities in regards to operations and management planning activities. The York Area MPO is a leader in the state in regards to considering and implementing regional analysis of the transportation system.

- Well thought out presentations to Technical and Coordinating Committees tackling tough and controversial subjects.

- The MPO’s Transportation Advisory Committee biennial role of reviewing, evaluating, and selecting Transportation Alternatives Program (TAP) projects (now known as Transportation Alternatives Set-Aside projects).

- Use of UPWP funding to support special committees within the region. An example is the Focus 81 Committee in the Lackawanna / Luzerne Transportation Study MPO, whose charge is safety and congestion along I-81.
## FHWA PERFORMANCE MEASURES SUMMARY (as of August 2017)

<td>1. Annual Hours of Peak Hour Excessive Delay on NHS per capita.  2. Percentage of Non-Single Occupancy Vehicle Travel on NHS.  3. Total Emission Reductions on CMAQ projects.</td>
<td>• Census designated urbanized areas  • Census population &gt;1 million  • EPA designated non-attainment area for ozone, CO, or PM10/PM2.5.  • CMAQ emissions applies to any MPO in non-attainment area</td>
<td>Travel time dataset [NPRMDS, INRIX, etc.]  Hourly traffic volume counts  Vehicle classification data or estimates  Vehicle Occupancy data or estimates  US Census for Urbanized Area populations  EPA designations for non-attainment areas</td>
</tr>
<tr>
<td><strong>Asset Management</strong></td>
<td>For Pavements and Bridges on the NHS</td>
<td>8 components: Objectives, Measures, Inventory, Performance Gap, Life cycle, Risk assessment, Finance plan, Investment strategies</td>
<td>NBI  HPMS  Management systems</td>
</tr>
</tbody>
</table>

### Upcoming Due Dates

- **Pavements and Bridges:**
  - Jan 2018 = 1st 4-year performance period begins. Target setting done by 5/20/18. MPOs have another 180 days.
  - First full extent Interstate submittal date is April 15, 2019.
  - First full extent Interstate and NHS submittal date is June 15, 2021.

- **CMAQ:**
  - Target setting by 5/20/2018
  - Initial goals will be set in annual HSIP report due August 2017.

- **Freight:**
  - Target setting by 5/20/2018
  - Initial goals will be set in annual HSIP report due August 2017.

### Minimum Threshold

- **Pavements and Bridges:**
  - • Percentage of Interstate Pavements in Poor Condition must be < 5%
  - • Missing, invalid, and unresolved HPMS data must be no more than 5%
  - • If minimum threshold is not met annually, NHPP and STP funds are set aside specifically for Pavement projects on the NHS.
  - • If significant progress towards goal is not made, DOT will document actions to achieve.

- **CMAQ:**
  - • If minimum is not met for 3 consecutive years, States must obligate and set aside NHPP funds specifically for NHS bridge projects.
  - • If significant progress towards goal is not made, DOT will document actions to achieve.

### Penalty

- **Pavements and Bridges:**
  - • If minimum threshold is not met annually, NHPP and STP funds are set aside specifically for Pavement projects on the NHS.
  - • If significant progress towards goal is not made, DOT will document actions to achieve.

- **CMAQ:**
  - • If no plan: Reduce pro-rata share of projects to 65%
  - • If significant progress towards goal is not made, DOT will document actions to achieve.

### Additional Notes

- **Pennsylvania:**
  - Pavements in GOOD and POOR condition.
  - Bridges:
    - NHS for Pavements and Bridges on the NHS.
    - NHS for Pavements and Bridges on the NHS.
  - CMAQ:
    - • If minimum threshold is not met annually, NHPP and STP funds are set aside specifically for Pavement projects on the NHS.
    - • If significant progress towards goal is not made, DOT will document actions to achieve.
  - Freight:
    - • If minimum threshold is not met annually, NHPP and STP funds are set aside specifically for Pavement projects on the NHS.
    - • If significant progress towards goal is not made, DOT will document actions to achieve.
  - Asset Management:
    - • If minimum threshold is not met annually, NHPP and STP funds are set aside specifically for Pavement projects on the NHS.
    - • If significant progress towards goal is not made, DOT will document actions to achieve.
